Class 529-T	\$16	0.15%

Management's discussion of fund performance

The fund's Class 529-T shares gained 7.13% for the year ended October 31, 2024. That result compares with a 6.59% gain for the Bloomberg 1-5 Year U.S. Government/Credit A+ Index.

What factors influenced results

The U.S. economy continued to grow during the fund's fiscal year, and with inflation easing, the U.S. Federal Reserve began instituting interest rate cuts late in the period. Equities posted strong gains, while bond investors enjoyed higher yields for much of the period.

Overall, the fund's longer-duration holdings were particularly additive to returns during the period, while short-duration holdings, while offering the potential for income and added stability, saw total returns below that of the overall portfolio.

How a hypothetical \$10,000 investment has grown

Figures reflect deduction of the maximum sales charge and assume reinvestment of dividends and capital gains.

Effective July 24, 2024, the fund's primary benchmark changed from the Bloomberg 1-5 Year U.S. Government/Credit A+ Index (the "Previous Primary Benchmark") to the Bloomberg U.S. Aggregate Index, a broad-based index that represents the overall applicable securities market, as required by the SEC. The Previous Primary Benchmark provides a means to compare the fund's results to a benchmark that the investment adviser believes is more representative of the fund's investment universe. There is no change in the fund's investment strategies as a result of the benchmark change.
