**What were the fund costs for the last year?** (based on a hypothetical \$10,000 investment)

Share class	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class 529-T	\$19	0.17%

**Management's discussion of fund performance**

The fund's Class 529-T shares gained 18.92% for the year ended October 31, 2024. That result compares with a 38.02% gain for the S&P 500 Index.

**What factors influenced results**

The U.S. economy continued to grow during the fund's fiscal year. Inflation eased, and the U.S. Federal Reserve instituted interest rate cuts late in the period. Meanwhile overseas, developed economies saw pockets of weakness.

Domestic equities posted strong gains, while bond investors enjoyed higher yields for much of the period. While equities domiciled overseas offered positive returns, they did not meaningfully add to the overall results of the portfolio. Dividend-paying equities contributed greatly and growth-oriented equities were likewise additive.

High-yield bonds allocation was additive to the results of the portfolio. Other bond holdings posted more muted absolute results, though the income and stability provided by bonds helped dampen the portfolio's volatility.

**How a hypothetical \$10,000 investment has grown**

Figures reflect deduction of the maximum sales charge and assume reinvestment of dividends and capital gains.
