

Semi-annual report for the period ended June 30, 2025

# Seeking high income in public and private credit markets

# Capital Group KKR Multi-Sector+ seeks to blend public fixed income and private credit to pursue high income.

Fund results shown in this report, unless otherwise indicated, are for Class F-2 shares. Class A share results are shown at net asset value unless otherwise indicated. If a sales charge (maximum 3.75%) had been deducted from Class A shares, the results would have been lower. Results are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com.

Here are the average annual total returns on a \$1,000 investment for the period ended June 30, 2025:

	(since 4/29/2025)
Class F-2 shares	2.73%
Class A shares (reflecting 3.75% maximum sales charge)	(1.09)

For other share class results, visit capital group.com.

The total annual fund operating expense ratios are 1.33% for Class F-2 shares and 1.62% for Class A shares, and the net expense ratios are 1.03% for Class F-2 shares and 1.32% for Class A shares as of the prospectus dated April 22, 2025. The expense ratios are based on estimated amounts for the current fiscal year.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Refer to capitalgroup.com for more information.

The investment adviser and sub-adviser are currently reimbursing a portion of other expenses. Net expense ratios reflect the reimbursement, without which they would have been higher. The reimbursement will be in effect through at least April 22, 2026, and renewed annually thereafter unless terminated by the fund, the investment adviser and sub-adviser or otherwise. Please see the fund's most recent prospectus for details.

The fund's net 30-day yield as of June 30, 2025, calculated in accordance with the U.S. Securities and Exchange Commission (SEC) formula, was 5.42% for Class F-2 shares and 5.23% for Class A shares. The fund's gross 30-day yield as of that date was 4.75% for Class F-2 shares and 4.58% for Class A shares. The Class A share results reflect the 3.75% maximum sales charge.

The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Higher yielding, higher risk bonds can fluctuate in price more than investment-grade bonds, so investors should maintain a long-term perspective. Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries. Investments in mortgage-related securities involve additional risks, such as prepayment risk. As a non-diversified fund, Capital Group KKR Multi-Sector+ has the ability to invest a larger percentage of assets in the securities of a smaller number of issuers than a diversified fund. As a result, poor results by a single issuer could adversely affect fund results more than if the fund were invested in a larger number of issuers. Refer to the fund prospectus and the Risk Factors section of this report for more information on these and other risks associated with investing in the fund.

The fund is an interval fund that currently provides liquidity to shareholders through quarterly repurchase offers for up to 10% of its outstanding shares. To the extent more than 10% of outstanding shares are tendered for repurchase, the redemption proceeds are generally distributed proportionately to redeeming investors ("proration"). Due to this repurchase limit, shareholders may be unable to liquidate all or a portion of their investment during a particular repurchase offer window. In addition, anticipating proration, some shareholders may request more shares to be repurchased than they actually wish, increasing the likelihood of proration. Shares are not listed on any stock exchange, and we do not expect a secondary market in the shares to develop. Due to these restrictions, investors should consider their investment in the fund to be subject to illiquidity risk.

Investment strategies are not guaranteed to meet their objectives and are subject to loss. Investing in the fund is not suitable for all investors. Investors should consult their investment professional before making an investment decision and evaluate their ability to invest for the long term. Because of the nature of the fund's investments, the results of the fund's operations may be volatile. Accordingly, investors should understand that past performance is not predictive of future results.

Bond investments may be worth more or less than the original cost when redeemed. High-yield, lower rated securities involve greater risk than higher rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. The fund may invest in structured products, which generally entail risks associated with derivative instruments and bear risks of the underlying investments, index or reference obligation. These securities include asset-based finance securities, mortgage-related assets and other asset-backed instruments, which may be sensitive to changes in interest rates, subject to early repayment risk, and their value may fluctuate in response to the market's perception of issuer creditworthiness; while generally supported by some form of government or private guarantee, there is no assurance that private guarantors will meet their obligations. While not directly correlated to changes in interest rates, the values of inflation-linked bonds generally fluctuate in response to changes in real interest rates and may experience greater losses than other debt securities with similar durations. The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds. For example, the fund may purchase and write call and put options on futures, giving the holder the right to assume a long (call) or short (put) position in a futures contract at a specified price. There is no assurance of a liquid market for any futures or futures options contract at any time.

The fund invests in private, illiquid credit securities, consisting primarily of loans and asset-backed finance securities. The fund may invest in or originate senior loans, which hold the most senior position in a business's capital structure. Some senior loans lack an active trading market and are subject to resale restrictions, leading to potential illiquidity. The fund may need to sell other investments or borrow to meet obligations. The fund may also invest in mezzanine debt, which is generally unsecured and subordinated, carrying higher credit and liquidity risk than investment-grade corporate obligations. Default rates for mezzanine debt have historically been higher than for investment-grade securities. Bank loans are often less liquid than other types of debt instruments, and general market and financial conditions may affect the prepayment of bank loans. As such, the prepayments cannot be predicted with accuracy.

Illiquid assets are more difficult to sell and may become impossible to sell in volatile market conditions. Reduced liquidity may have an adverse impact on the market price of such holdings, and the fund may be unable to sell such holdings when necessary to meet its liquidity needs or to try to limit losses, or may be forced to sell at a loss. Illiquid assets are also generally difficult to value because they rarely have readily available market conditions. Such securities require fair value pricing, which is based on subjective judgments and may differ materially from the value that would be realized if the security were to be sold.

The fund intends to declare daily dividends from net investment income and distribute the accrued dividends, which may fluctuate, to investors each month. Generally, dividends begin accruing on the day payment for shares is received by the fund. In the event the fund's distribution of net investment income exceeds its income and capital gains paid by the fund's underlying investments for tax purposes, a portion of such distribution may be classified as return of capital. The fund's current intention not to use borrowings other than for temporary and/or extraordinary purposes may result in a lower yield than it could otherwise achieve by using such strategies and may make it more difficult for the fund to achieve its investment objective than if the fund were to use leverage on an ongoing basis. There can be no assurance that a change in market conditions or other factors will not result in a change in the fund distribution rate at a future time.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

#### Fellow investors:

Results for Capital Group KKR Multi-Sector+ for the period ended June 30, 2025, are shown in the table below, as well as results of the fund's benchmark.

For additional information about the fund, its investment results, holdings and portfolio managers, refer to <a href="https://www.capitalgroup.com/individual/investments/interval-funds/details/msp-a">https://www.capitalgroup.com/individual/investments/interval-funds/details/msp-a</a>. <sup>(</sup>a) Value determined using significant unobservable inputs.

(e) Step bond; coupon rate may change at a later date.

#### Key to abbreviation(s)

CLO = Collateralized Loan Obligations
CME = CME Group
PIK = Payment In Kind
REIT = Real Estate Investment Trust
SOFR = Secured Overnight Financing Rate
USD = U.S. Dollar

<sup>(</sup>b) Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$90,143,000, which represented 38.30% of the net assets of the fund.

<sup>(</sup>c) Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$44,725,000, which represented 19.00% of the net assets of the fund.

<sup>(</sup>d) Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available. For short-term securities, the date of the next scheduled coupon rate change is considered to be the maturity date.

<sup>(</sup>f) Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was \$27,579,000, which represented 11.72% of the net assets of the fund.

<sup>(</sup>g) Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Payment methods and rates are as of the most recent payment when available.

<sup>(</sup>h) All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$203,000, which represented 0.09% of the net assets of the fund.

<sup>(</sup>i) Security did not produce income during the last 12 months.

<sup>(</sup>j) Rate represents the seven-day yield at 6/30/2025.

<sup>(</sup>k) Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

<sup>(</sup>I) The maximum potential amount the fund may pay as a protection seller should a credit event occur.

<sup>(</sup>m) The prices and resulting values for credit default swap indices serve as an indicator of the current status of the payment/performance risk. As the value of a sell protection credit default swap increases or decreases, when compared to the notional amount of the swap, the payment/performance risk may decrease or increase, respectively.

<sup>(</sup>n) The fund was seeded, and began trading, on 4/24/2025. The fund commenced operations and shares became available for purchase on 4/29/2025.

#### 1. Organization

Capital Group KKR Multi-Sector+ (the "fund") was organized on October 4, 2024 as a Delaware statutory trust. The fund is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a non-diversified, closed-end management investment company that operates as an interval fund. The fund seeks to provide a high level of current income. The fund will seek to allocate approximately 60% of its net assets to public credit assets and approximately 40% to private credit assets. Capital Research and Management Company ("CRMC") is the fund's investment adviser. KKR Credit Advisors (US) LLC ("KKR") is the fund's sub-adviser and primarily manages private credit assets held by the fund.

The fund has five share classes consisting of four retail share classes (Classes A, A-2, F-2 and F-3) and one retirement plan share class (Class R-6). The retirement plan share class is generally offered only through eligible employer-sponsored retirement plans. The fund's share classes are described further in the following table:

Share class	Initial sales charge	Contingent deferred sales charge upon redemption
Class A	3.75%	0.75% for redemptions within 18 months of purchase for investments of \$500,000 or more
Class A-2	2.00%	1% for redemptions within one year of purchase for investments of \$250,000 or more
Classes F-2 and F-3	None	None
Class R-6	None	None

Holders of all share classes have equal pro rata rights to the assets, dividends and liquidation proceeds of the fund. Each share class has identical voting rights, except for the exclusive right to vote on matters affecting only its class. Share classes have different fees and expenses ("class-specific fees and expenses"), primarily due to different arrangements for distribution, transfer agent and administrative services. Differences in class-specific fees and expenses will result in differences in net investment income and, therefore, the payment of different per-share dividends by each share class.

#### 2. Significant accounting policies

The fund is an investment company that applies the accounting and reporting guidance issued in Topic 946 by the U.S. Financial Accounting Standards Board ("FASB"). The fund's financial statements have been prepared to comply with U.S. generally accepted accounting principles ("U.S. GAAP"). These principles require the fund's investment adviser to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates. Subsequent events, if any, have been evaluated through the date of issuance in the preparation of the financial statements. The fund follows the significant accounting policies described in this section, as well as the valuation policies described in the next section on valuation.

Operating segments – The fund represents a single operating segment as the operating results of the fund are monitored as a whole and its long-term asset allocation is determined in accordance with the terms of its prospectus, based on defined investment objectives that are executed by the fund's portfolio management team. A senior executive team comprised of the fund's Principal Executive Officer and Principal Financial Officer, serves as the fund's chief operating decision maker ("CODM"), who act in accordance with Board of Trustee reviews and approvals. The CODM uses financial information, such as changes in net assets from operations, changes in net assets from fund share transactions, and income and expense ratios, consistent with that presented within the accompanying financial statements and financial highlights to assess the fund's profits and losses and to make resource allocation decisions. Segment assets are reflected in the statement of assets and liabilities as net assets, which consists primarily of investment securities, at value, and significant segment expenses are listed in the accompanying statement of operations.

Security transactions and related investment income – Security transactions are recorded by the fund as of the date the trades are executed with brokers. Realized gains and losses from security transactions are determined based on the specific identified cost of the securities. In the event a security is purchased with a delayed payment date, the fund will segregate liquid assets sufficient to meet its payment obligations. Dividend income is recognized on the ex-dividend date and interest income is recognized on an accrual basis. Market discounts, premiums and original issue discounts on fixed-income securities are amortized daily over the expected life of the security.

Class allocations - Income, fees and expenses (other than class-specific fees and expenses) are allocated daily among the various share classes based on the relative value of their settled shares. Realized gains and losses and unrealized appreciation and depreciation are allocated daily among the various share classes based on their relative net assets. Class-specific fees and expenses, such as distribution, transfer agent and administrative services, are charged directly to the respective share class.

Distributions paid or accrued to shareholders – Income dividends are declared daily after the determination of the fund's net investment income and are paid to shareholders monthly. Capital gain distributions are recorded on the ex-dividend date.

Currency translation – Assets and liabilities, including investment securities, denominated in currencies other than U.S. dollars are translated into U.S. dollars at the exchange rates supplied by one or more pricing vendors on the valuation date. Purchases and sales of investment securities and income and expenses are translated into U.S. dollars at the exchange rates on the dates of such transactions. The effects of changes in exchange rates on investment securities are included with the net realized gain or loss and net unrealized appreciation or depreciation on investments in the fund's statement of operations. The realized gain or loss and unrealized appreciation or depreciation resulting from all other transactions denominated in currencies other than U.S. dollars are disclosed separately.

New accounting pronouncements - In December 2023, the FASB issued Accounting Standards Update 2023-09 ("the ASU"), Income Taxes (Topic 740): Improvements to Income Tax Disclosures, which enhances income tax disclosures, including disclosure of income taxes paid disaggregated by jurisdiction. The ASU is effective for annual periods beginning after December 15, 2024, with early adoption permitted. Management is currently evaluating the ASU and its impact to the financial statements.

#### 3. Valuation

CRMC, the fund's investment adviser, values the fund's investments at fair value as defined by U.S. GAAP. The net asset value per share is calculated once daily as of the close of regular trading on the New York Stock Exchange, normally 4 p.m. New York time, each day the New York Stock Exchange is open.

Methods and inputs – The fund's investment adviser uses the following methods and inputs to establish the fair value of the fund's assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

Equity securities, including depositary receipts, exchange-traded funds, and certain convertible preferred stocks that trade on an exchange or market, are generally valued at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price. Prices for each security are taken from the principal exchange or market on which the security trades.

Fixed-income securities, including short-term securities, and loans other than directly originated loans, are generally valued at evaluated prices obtained from third-party pricing vendors. Vendors value such securities based on one or more of the inputs described in the following table. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed-income securities in which the fund is authorized to invest. However, these classifications are not exclusive, and any of the inputs may be used to value any other class of fixed-income security.

Fixed-income class	Example of standard inputs		
All	Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral characteristics or performance and other reference data (collectively referred to as "standard inputs")		
Corporate bonds, notes & loans; convertible securities	Standard inputs and underlying equity of the issuer		
Bonds & notes of governments & government agencies	Standard inputs and interest rate volatilities		
Mortgage-backed; asset-backed obligations	Standard inputs and cash flows, prepayment information, default rates, delinquency and loss assumptions, credit enhancements and specific deal information		
Municipal securities	Standard inputs and, for certain distressed securities, cash flows or liquidation values using a net present value calculation based on inputs that include, but are not limited to, financial statements and debt contracts		

Securities with both fixed-income and equity characteristics, or equity securities traded principally among fixed-income dealers, are generally valued in the manner described for either equity or fixed-income securities, depending on which method is deemed most appropriate by the fund's investment adviser. The Capital Group Central Cash Fund ("CCF"), a fund within the Capital Group Central Fund Series ("Central Funds"), is valued based upon a floating net asset value, which fluctuates with changes in the value of CCF's portfolio securities. The underlying securities are valued based on the policies and procedures in CCF's statement of additional information.

Exchange-traded futures are generally valued at the official settlement price on the exchange or market on which such instruments are traded, as of the close of business on the day the futures are being valued. Exchange-traded futures are generally valued at the official settlement price of the exchange or market on which such instruments are traded, as of the close of business on the day the futures are being valued. Swaps are generally valued using evaluated prices obtained from third-party pricing vendors who calculate these values based on market inputs that may include the yields of the indices referenced in the instrument and the relevant curve, dealer quotes, default probabilities and recovery rates, and terms of the contract.

Securities and other assets for which representative market quotations are not readily available or are considered unreliable by the fund's investment adviser are fair valued as determined in good faith under fair valuation guidelines adopted by the fund's investment adviser and approved by the board of trustees as further described. The investment adviser follows fair valuation guidelines, consistent with U.S. Securities and Exchange Commission rules and guidance, to consider relevant principles and factors when making fair value determinations. The investment adviser considers relevant indications of value that are reasonably and timely available to it in determining the fair value to be assigned to a particular security, such as the type and cost of the security, restrictions on resale of the security, relevant financial or business developments of the issuer, actively traded similar or related securities, dealer or broker quotes, conversion or exchange rights on the security, related corporate actions, significant events occurring after the close of trading in the security, and changes in overall market conditions. Directly originated loans are valued on an individual loan basis. The fair value of each loan may be informed by the inputs of third-party services. These valuations will incorporate borrower-specific information such as credit performance, significant events affecting the borrower or underlying collateral, and relevant market developments each business day that the New York Stock Exchange is open. In addition, the closing prices of equity securities that trade in markets outside U.S. time zones may be adjusted to reflect significant events that occur after the close of local trading but before the net asset value of each share class of the fund is determined. Fair valuations of investments that are not actively trading involve judgment and may differ materially from valuations that would have been used had greater market activity occurred.

Processes and structure – The fund's board of trustees has designated the fund's investment adviser to make fair value determinations, subject to board oversight. The investment adviser has established a Joint Fair Valuation Committee (the "Committee") to administer, implement and oversee the fair valuation process and to make fair value decisions. The Committee regularly reviews its own fair value decisions, as well as decisions made under its standing instructions to the investment adviser's valuation team. The Committee reviews changes in fair value measurements from period to period, pricing vendor information and market data, and may, as deemed appropriate, update the fair valuation guidelines to better reflect the results of back testing and address new or evolving issues. Pricing decisions, processes and controls over security valuation are also subject to additional internal reviews facilitated by the investment adviser's global risk management group. The Committee reports changes to the fair valuation guidelines to the board of trustees. The fund's board and audit committee also regularly review reports that describe fair value determinations and methods.

Classifications – The fund's investment adviser classifies the fund's assets and liabilities into three levels based on the inputs used to value the assets or liabilities. Level 1 values are based on quoted prices in active markets for identical securities. Level 2 values are based on significant observable market inputs, such as quoted prices for similar securities and quoted prices in inactive markets. Certain securities trading outside the U.S. may transfer between Level 1 and Level 2 due to valuation adjustments resulting from significant market movements following the close of local trading. Level 3 values are based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities. The valuation levels are not necessarily an indication of the risk or liquidity associated with the underlying investment. For example, U.S. government securities are reflected as Level 2 because the inputs used to determine fair value may not always be quoted prices in an active market. The fund's valuation levels as of June 30, 2025, were as follows (dollars in thousands):

	Investment securities			
	Level 1	Level 2	Level 3	Total
Assets:				
Bonds, notes & other debt instruments:				
Corporate bonds, notes & loans	\$ -	\$ 83,020	\$46,644	\$129,664
Mortgage-backed obligations	_	32,167	_	32,167
Asset-backed obligations	_	30,082	1,684	31,766
U.S. Treasury bonds & notes	_	17,791	_	17,791
Convertible bonds & notes	_	354	_	354
Common stocks	36	_	_	36
Short-term securities	20,852	_	_	20,852
Total	\$20,888	\$163,414	\$48,328	\$232,630

#### Other investments<sup>1</sup>

Impact to

	Level 1	Level 2	Level 3	Total
Assets:				
Unrealized appreciation on futures contracts	\$ 308	\$ -	\$-	\$ 308
Unrealized appreciation on centrally cleared credit default swaps	_	1,302	_	1,302
Liabilities:				
Unrealized depreciation on futures contracts	(178)	_	_	(178)
Total	\$ 130	\$1,302	<del></del>	\$1,432
			=	

<sup>&</sup>lt;sup>1</sup>Futures contracts and credit default swaps are not included in the fund's investment portfolio.

The following table reconciles the valuation of the fund's Level 3 investment securities and related transactions for the period April 29, 2025, commencement of operations, through June 30, 2025 (dollars in thousands):

	Beginning value at 4/29/2025	Transfers into Level 3 <sup>2</sup>	Purchases	Sales	Accrued premiums/ discounts	Net realized gain (loss) <sup>3</sup>	Unrealized appreciation (depreciation) <sup>3</sup>	Transfers out of Level 3 <sup>2</sup>	Ending value at 6/30/2025
Bonds, notes & other debt instruments	\$-	\$-	\$48,137	\$(53)	\$8	\$-4	\$236	\$-	\$48,328
Net unrealized appre	ciation (depreciation	on) during th	e period on L	evel 3 inv	vestment secur	ities held at Jui	ne 30, 2025		\$ 236

<sup>&</sup>lt;sup>2</sup>Transfers into or out of Level 3 are based on the beginning market value of the quarter in which they occurred. These transfers are the result of changes in the availability of pricing sources and/or in the observability of significant inputs used in valuing the securities.

Unobservable inputs – Valuation of the fund's Level 3 securities is based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities. The following table provides additional information used by the fund's investment adviser to fair value the fund's Level 3 securities (dollars in thousands):

	Value at 6/30/2025	Valuation technique(s)	Unobservable inputs	Range (if applicable)	Weighted average*	valuation from an increase in input <sup>†</sup>
Daniela matera () atlant		Vialal analysis	Yield	9% - 10%	7%	Decrease
Bonds, notes & other debt instruments	\$48,328	Yield analysis	Discount margin	2% - 9%	5%	Decrease
debt instruments		Transaction	Transaction price	Not applicable	Not applicable	Not applicable
Total	\$48,328					

<sup>\*</sup>Weighted average is by relative fair value.

#### 4. Risk factors

Investing in the fund may involve certain risks including, but not limited to, those described below.

Market conditions – The prices of, and the income generated by, the securities held by the fund may decline - sometimes rapidly or unpredictably - due to various factors, including events or conditions affecting the general economy or particular industries or companies; overall market changes; local, regional or global political, social or economic instability; governmental, governmental agency or central bank responses to economic conditions; levels of public debt and deficits; changes in inflation rates; and currency exchange rate, interest rate and commodity price fluctuations.

Economies and financial markets throughout the world are highly interconnected. Economic, financial or political events, trading and tariff arrangements, wars, terrorism, cybersecurity events, natural disasters, public health emergencies (such as the spread of infectious disease), bank failures and other circumstances in one country or region, including actions taken by governmental or quasi-governmental authorities in response to any of the foregoing, could have impacts on global economies or markets. As a result, whether or not the fund invests in securities of issuers located in or with significant exposure to the countries affected, the value and liquidity of the fund's investments may be negatively affected by developments in other countries and regions.

<sup>&</sup>lt;sup>3</sup>Net realized gain and unrealized depreciation are included in the related amounts on investments in the fund's statement of operations.

<sup>&</sup>lt;sup>4</sup>Amount less than one thousand.

<sup>†</sup>This column represents the directional change in fair value of the Level 3 securities that would result in an increase from the corresponding input. Significant increases and decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.

Repurchase offers risk – The fund is an interval fund and, in order to provide liquidity to shareholders, the fund, subject to applicable law, will conduct periodic repurchase offers of 5% to 25% of its outstanding shares at net asset value, subject to approval of the board. The fund expects initially to conduct quarterly repurchase offers for 10% of its outstanding shares under ordinary circumstances. As a result, shareholders may be unable to liquidate all or a given percentage of their investment in the fund during a particular repurchase offer. Some shareholders, in anticipation of proration, may request that more shares be repurchased than they wish to have repurchased in a particular month, thereby increasing the likelihood that proration will occur. A shareholder may be subject to market and other risks, and the net asset value per share of shares subject of a repurchase request in a repurchase offer may decline to the extent there is any delay between the repurchase request deadline and the date on which the net asset value for tendered shares is determined. Such fluctuations may be exacerbated by currency fluctuations to the extent the fund invests in securities denominated in currencies other than the U.S. dollar. The net asset value on the repurchase request deadline or the repurchase pricing date may be higher or lower than on the date a shareholder submits a repurchase request.

The fund believes that these repurchase offers are generally beneficial to the fund's shareholders, and repurchases generally will be funded from available cash (including through borrowings), cash from the sale of shares or sales of portfolio securities. However, repurchase offers and the need to fund repurchase obligations may affect the ability of the fund to be fully invested or force the fund to maintain a higher percentage of its assets in liquid investments than would otherwise be the case, which could adversely affect the fund's investment performance. In addition, diminution in the size of the fund through repurchases may result in an increased expense ratio for shareholders who do not submit a repurchase request, may result in untimely sales of portfolio securities (with associated imputed transaction costs, which may be significant) and, unless offset by sufficient sales of fund shares, may limit the ability of the fund to participate in new investment opportunities or to achieve its investment objective. In addition, if the fund borrows to finance repurchases, interest on that borrowing will negatively affect shareholders who do not submit a repurchase request by increasing the fund's expenses and reducing any net investment income.

Issuer risks – The prices of, and the income generated by, securities held by the fund may decline in response to various factors directly related to the issuers of such securities, including reduced demand for an issuer's goods or services, poor management performance, major litigation, investigations or other controversies related to the issuer, changes in the issuer's financial condition or credit rating, changes in government regulations affecting the issuer or its competitive environment and strategic initiatives such as mergers, acquisitions or dispositions and the market response to any such initiatives. An individual security may also be affected by factors relating to the industry or sector of the issuer or the securities markets as a whole, and conversely an industry or sector or the securities markets may be affected by a change in financial condition or other event affecting a single issuer.

Investing in debt instruments – The prices of, and the income generated by, bonds, loans and other debt securities held by the fund may be affected by factors such as the interest rates, maturities and credit quality of these securities.

Rising interest rates will generally cause the prices of bonds and other debt securities to fall. Also, when interest rates rise, issuers of debt securities that may be prepaid at any time, such as mortgage- or other asset-based finance securities, are less likely to refinance existing debt securities, causing the average life of such securities to extend. A general change in interest rates may cause investors to sell debt securities on a large scale, which could also adversely affect the price and liquidity of debt securities and could also result in increased repurchase requests from fund shareholders. Falling interest rates may cause an issuer to redeem, call or refinance a debt security before its stated maturity, which may result in the fund having to reinvest the proceeds in lower yielding securities. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities.

Bonds and other debt securities are also subject to credit risk, which is the possibility that the credit strength of an issuer or guarantor will weaken or be perceived to be weaker, and/or an issuer of a debt security will fail to make timely payments of principal or interest and the security will go into default. Changes in actual or perceived creditworthiness may occur quickly. A downgrade or default affecting any of the fund's securities could cause the value of shares to decrease. Lower quality debt securities generally have higher rates of interest and may be subject to greater price fluctuations than higher quality debt securities. Credit risk is gauged, in part, by the credit ratings of the debt securities in which the fund invests. However, ratings are only the opinions of the rating agencies issuing them and are not guarantees as to credit quality or an evaluation of market risk. The investment adviser and the sub-adviser rely on their own credit analysts to research issuers and issues in assessing credit and default risks.

Investing in lower rated debt instruments – Lower rated bonds and other lower rated debt securities, rated Ba1/BB+ or below by Nationally Recognized Statistical Rating Organizations, generally have higher rates of interest and involve greater risk of default or price declines due to changes in the issuer's creditworthiness than those of higher quality debt securities. The market prices of these securities may fluctuate more than the prices of higher quality debt securities and may decline significantly in periods of general economic difficulty. These risks may be increased with respect to investments in "junk bonds," namely debt securities that are rated Ba1 or below

and BB+ or below by Nationally Recognized Statistical Ratings Organizations designated by the investment adviser or sub-adviser or unrated securities that are deemed by the investment adviser or sub-adviser to be their equivalent.

Investing in illiquid investments and liquidity risk – The sub-adviser expects to invest primarily in private, illiquid securities. Illiquid assets may be more difficult to value, especially in changing markets. In addition, illiquid securities are typically subject to restrictions on resale and the fund may be legally, contractually or otherwise prohibited from selling or disposing certain investments for a period of time. Additionally, the sale of less liquid or illiquid holdings may involve substantial delays (including delays in settlement) and additional costs and the fund may be unable to sell such holdings when necessary to meet its liquidity needs or to try to limit losses, or may be forced to sell at a loss.

Fund holdings in general may be or may become difficult or impossible to sell, particularly during times of market turmoil. In addition legal or contractual restrictions on resale, liquidity may be impacted by the lack of an active market for a holding or the reduced number and capacity of market participants to make a market in such holding. Market prices for less liquid or illiquid holdings may be volatile or difficult to determine, and reduced liquidity may have an adverse impact on the market price of such holdings.

Investing outside the U.S. - Securities of issuers domiciled outside the U.S. or with significant operations or revenues outside the U.S., and securities tied economically to countries outside the U.S., may lose value because of adverse political, social, economic or market developments (including social instability, regional conflicts, terrorism and war) in the countries or regions in which the issuers are domiciled, operate or generate revenue or to which the securities are tied economically. These securities may also lose value due to changes in foreign currency exchange rates against the U.S. dollar and/or currencies of other countries. Issuers of these securities may be more susceptible to actions of foreign governments, such as nationalization, currency blockage or the imposition of price controls, sanctions, or punitive taxes, each of which could adversely impact the value of these securities. Securities markets in certain countries may be more volatile and/or less liquid than those in the U.S. Investments outside the U.S. may also be subject to different regulatory, legal, accounting, auditing, financial reporting and recordkeeping requirements, and may be more difficult to value, than those in the U.S. In addition, the value of investments outside the U.S. may be reduced by foreign taxes, including foreign withholding taxes on interest and dividends. Further, there may be increased risks of delayed settlement of securities purchased or sold by the fund, which could impact the liquidity of the fund's portfolio. The risks of investing outside the U.S. may be heightened in connection with investments in emerging markets.

Exposure to country, region, industry or sector – Subject to the fund's investment limitations, the fund may have significant exposure to a particular country, region, industry or sector. Such exposure may cause the fund to be more impacted by risks relating to and developments affecting the country, region, industry or sector, and thus its net asset value may be more volatile, than a fund without such levels of exposure. For example, if the fund has significant exposure in a particular country, then social, economic, regulatory or other issues that negatively affect that country may have a greater impact on the fund than on a fund that is more geographically diversified.

Investing in mortgage-related and other asset-based finance securities – Mortgage-related securities, such as mortgage-backed securities, and other asset-based finance securities, include debt obligations that represent interests in pools of mortgages or other income-bearing assets, such as residential mortgage loans, home equity loans, mortgages on commercial buildings, consumer loans and equipment leases. Investments in such securities may include collateralized debt obligations, such as collateralized loan obligations and collateralized mortgage obligations, and may, from time to time, include lower-rated tranches of these instruments. While such securities are subject to the risks associated with investments in debt instruments generally (for example, credit, extension and interest rate risks), they are also subject to other and different risks. Mortgage-backed and other asset-based finance securities are subject to changes in the payment patterns of borrowers of the underlying debt, potentially increasing the volatility of the securities and the fund's net asset value. When interest rates fall, borrowers are more likely to refinance or prepay their debt before its stated maturity. This may result in the fund having to reinvest the proceeds in lower yielding securities, effectively reducing the fund's income. Conversely, if interest rates rise and borrowers repay their debt more slowly than expected, the time in which the mortgage-backed and other asset-based finance securities are paid off could be extended, reducing the fund's cash available for reinvestment in higher yielding securities. Mortgage-backed securities are also subject to the risk that underlying borrowers will be unable to meet their obligations and the value of property that secures the mortgages may decline in value and be insufficient, upon foreclosure, to repay the associated loans. Investments in asset-based finance securities are subject to similar risks, as well as additional risks associated with the assets underlying those securities.

Interest rate risk – The values and liquidity of the securities held by the fund may be affected by changing interest rates. For example, the values of these securities may decline when interest rates rise and increase when interest rates fall. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities. The fund may invest in variable and floating rate securities. When the fund holds variable or floating rate securities, a decrease in market interest rates will adversely affect the income received from such securities and the net asset value of the fund's shares. Although the values of such securities are generally less sensitive to interest rate changes than those of other debt securities, the value of variable and floating rate securities may decline if their interest rates do not rise as quickly, or as much, as market interest rates. Conversely, floating rate securities will not generally increase in value if interest rates decline. During periods of extremely low short-term interest rates, the fund may not be able to maintain a positive yield or total return and, in relatively low interest rate environments, there are heightened risks associated with rising interest rates.

Investing in derivatives – The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds. Changes in the value of a derivative may not correlate perfectly with, and may be more sensitive to market events than, the underlying asset, rate or index, and a derivative instrument may cause the fund to lose significantly more than its initial investment. Derivatives may be difficult to value, difficult for the fund to buy or sell at an opportune time or price and difficult, or even impossible, to terminate or otherwise offset. The fund's use of derivatives may result in losses to the fund, and investing in derivatives may reduce the fund's returns and increase the fund's price volatility. The fund's counterparty to a derivative transaction (including, if applicable, the fund's clearing broker, the derivatives exchange or the clearinghouse) may be unable or unwilling to honor its financial obligations in respect of the transaction. In certain cases, the fund may be hindered or delayed in exercising remedies against or closing out derivative instruments with a counterparty, which may result in additional losses. Derivatives are also subject to operational risk (such as documentation issues, settlement issues and systems failures) and legal risk (such as insufficient documentation, insufficient capacity or authority of a counterparty, and issues with the legality or enforceability of a contract).

Investing in subordinated and unsecured or partially secured loans – The fund will, from time to time, invest in unsecured loans and secured subordinated loans, including second and lower lien loans. Second lien loans are generally second in line in terms of repayment priority. A second lien loan could have a claim on the same collateral pool as the first lien or it could be secured by a separate set of assets. Second lien loans generally give investors priority over general unsecured creditors in the event of an asset sale. The priority of the collateral claims of third or lower lien loans ranks below holders of second lien loans and so on. Such junior loans are subject to the same general risks inherent to any loan investment, including credit risk, market and liquidity risk and interest rate risk. Due to their lower place in the borrower's capital structure and possible unsecured or partially secured status, such loans involve a higher degree of overall risk than Senior Loans of the same borrower.

Nondiversification – As a nondiversified fund, the fund may invest a greater percentage of its assets in fewer issuers than a diversified fund. A fund that invests in a relatively smaller number of issuers is more susceptible to risks associated with a single economic, political, geographic or regulatory occurrence than a diversified fund might be. In addition, poor performance by a single issuer could adversely affect fund performance more than if the fund were invested in a larger number of issuers. The value of the fund's shares can be expected to fluctuate more than might be the case if the fund were more broadly diversified.

Management – The investment adviser and sub-adviser to the fund actively manage the fund's investments. Consequently, the fund is subject to the risk that the methods and analyses, including models, tools and data, employed by the investment adviser or sub-adviser in this process may be flawed or incorrect and may not produce the desired results. This could cause the fund to lose value or its investment results to lag relevant benchmarks or other funds with similar objectives.

#### 5. Certain investment techniques

Mortgage dollar rolls - The fund has entered into mortgage dollar roll transactions of to be announced ("TBA") securities in which the fund sells a TBA mortgage-backed security to a counterparty and simultaneously enters into an agreement with the same counterparty to buy back a similar TBA security on a specific future date at a predetermined price. Mortgage dollar rolls are accounted for as purchase and sale transactions and may result in an increase to the fund's portfolio turnover rate. Portfolio turnover rates excluding and including mortgage dollar rolls are presented at the end of the fund's financial highlights table.

Loans – The fund has entered into loan transactions in which the fund acquires a loan either through an agent, by assignment from another holder, or as a participation interest in another holder's portion of a loan. These loans are often administered by a financial institution that acts as agent for the holders of the loan, and the fund may be required to receive approval from the agent and/or borrower prior to the sale of the investment. The fund also invests in loans originated or negotiated by non-bank lenders in private markets, including first-lien loans, unsecured loans and secured subordinated loans (such as second and lower lien loans). Due to their unsecured or partially secured status, lower lien loans involve a higher degree of risk overall than senior loans of the same borrower. A loan's interest rate and maturity date may change based on the terms of the loan, including potential early payments of principal. There may be no active trading market for some loans, and the fund may not be able to readily dispose of certain loans at desired prices.

Unfunded commitments – The fund has participated in transactions that involve unfunded commitments, which may obligate the fund to make certain investments, including unsettled bank loan purchase transactions. The table below presents the fund's maximum

exposure of unfunded commitments as of June 30, 2025 (dollars in thousands). Net unrealized appreciation is disclosed as unrealized appreciation on unfunded commitments in the fund's statement of assets and liabilities and is included in net unrealized appreciation on investments in unaffiliated issuers in the fund's statement of operations.

Commitment	Maximum exposure	Unrealized appreciation (depreciation)	Percentage of net assets
Ares Secondaries Pbn Finance Co IV, LLC, Term Loan, (3-month USD CME Term SOFR + 2.90%) 7.22% 4/14/2039	\$ 1,059	\$ (6)	0.45%

<sup>\*</sup>Amount less than one thousand.

Futures contracts – The fund has entered into futures contracts, which provide for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument for a specified price, date, time and place designated at the time the contract is made. Futures contracts are used to strategically manage the fund's interest rate sensitivity by increasing or decreasing the duration of the fund or a portion of the fund's portfolio.

Upon entering into futures contracts, and to maintain the fund's open positions in futures contracts, the fund is required to deposit with a futures broker, known as a futures commission merchant ("FCM"), in a segregated account in the name of the FCM an amount of cash, U.S. government securities or other liquid securities, known as initial margin. The margin required for a particular futures contract is set by the exchange on which the contract is traded to serve as collateral, and may be significantly modified from time to time by the exchange during the term of the contract.

On a daily basis, the fund pays or receives variation margin based on the increase or decrease in the value of the futures contracts and records variation margin on futures contracts in the statement of assets and liabilities. Futures contracts may involve a risk of loss in excess of the variation margin shown on the fund's statement of assets and liabilities. The fund records realized gains or losses at the time the futures contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from futures contracts are recorded in the fund's statement of operations. The average month-end notional amount of futures contracts while held was \$35,733,000.

Swap contracts – The fund has entered into swap agreements, which are two-party contracts entered into primarily by institutional investors for a specified time period. In a typical swap transaction, two parties agree to exchange the returns earned or realized from one or more underlying assets or rates of return. Swap agreements can be traded on a swap execution facility (SEF) and cleared through a central clearinghouse (cleared), traded over-the-counter (OTC) and cleared, or traded bilaterally and not cleared. Because clearing interposes a central clearinghouse as the ultimate counterparty to each participant's swap, and margin is required to be exchanged under the rules of the clearinghouse, central clearing is intended to decrease (but not eliminate) counterparty risk relative to uncleared bilateral swaps. To the extent the fund enters into bilaterally negotiated swap transactions, the fund will enter into swap agreements only with counterparties that meet certain credit standards and subject to agreed collateralized procedures. The term of a swap can be days, months or years and certain swaps may be less liquid than others.

Upon entering into a centrally cleared swap contract, the fund is required to deposit cash, U.S. government securities or other liquid securities, which is known as initial margin. Generally, the initial margin required for a particular swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract.

On a daily basis, interest accruals related to the exchange of future payments are recorded as a receivable and payable in the fund's statement of assets and liabilities for centrally cleared swaps and as unrealized appreciation or depreciation in the fund's statement of assets and liabilities for bilateral swaps. For centrally cleared swaps, the fund also pays or receives a variation margin based on the increase or decrease in the value of the swaps, including accrued interest as applicable, and records variation margin in the statement of assets and liabilities. The fund records realized gains and losses on both the net accrued interest and any gain or loss recognized at the time the swap is closed or expires. Net realized gains or losses, as well as any net unrealized appreciation or depreciation, from swaps are recorded in the fund's statement of operations.

Swap agreements can take different forms. The fund has entered into the following type of swap agreement:

Credit default swap indices – The fund has entered into centrally cleared credit default swap indices, including CDX and iTraxx indices (collectively referred to as "CDSI"), in order to assume exposure to a diversified portfolio of credits or to hedge against existing credit risks. A CDSI is based on a portfolio of credit default swaps with similar characteristics, such as credit default swaps on high-yield bonds. In a typical CDSI transaction, one party (the protection buyer) is obligated to pay the other party (the protection seller) a stream of periodic payments over the term of the contract. If a credit event, such as a default or restructuring, occurs with respect to any of the underlying reference obligations, the protection seller must pay the protection buyer the loss on those credits.

The fund may enter into a CDSI transaction as either protection buyer or protection seller. If the fund is a protection buyer, it would pay the counterparty a periodic stream of payments over the term of the contract and would not recover any of those payments if no credit events were to occur with respect to any of the underlying reference obligations. However, if a credit event did occur, the fund, as a protection buyer, would have the right to deliver the referenced debt obligations or a specified amount of cash, depending on the terms of the applicable agreement, and to receive the par value of such debt obligations from the counterparty protection seller. As a protection seller, the fund would receive fixed payments throughout the term of the contract if no credit events were to occur with respect to any of the underlying reference obligations. If a credit event were to occur, however, the value of any deliverable obligation received by the fund, coupled with the periodic payments previously received by the fund, may be less than

the full notional value that the fund, as a protection seller, pays to the counterparty protection buyer, effectively resulting in a loss of value to the fund. Furthermore, as a protection seller, the fund would effectively add leverage to its portfolio because it would have investment exposure to the notional amount of the swap transaction. The average month-end notional amount of credit default swaps while held was \$41,533,000.

The following tables identify the location and fair value amounts on the fund's statement of assets and liabilities and the effect on the fund's statement of operations resulting from the fund's use of futures contracts and credit default swaps as of June 30, 2025, or for the period April 29, 2025, commencement of operations, through June 30, 2025 (dollars in thousands):

		Assets		Liabilities			
Contracts	Risk type	Location on statement of assets and liabilities	Value	Location on statement of assets and liabilities	Value		
Futures	Interest	Unrealized appreciation*	\$ 308	Unrealized depreciation*	\$178		
Swap (centrally cleared)	Credit	Unrealized appreciation*	1,302	Unrealized depreciation*	-		
			\$1,610		\$178		
		Net realized gain (loss)		Net unrealized appreciation (depre	ciation)		
Contracts	Risk Type	Location on statement of operations	Value	Location on statement of operations	Value		
Futures	Interest	Net realized gain (loss) on futures contracts	\$(102)	Net unrealized appreciation (depreciation) on futures contracts	\$ 130		
Swap	Credit	Net realized gain (loss) on swap contracts	614	Net unrealized appreciation (depreciation) on swap contracts	1,302		
				(			

<sup>\*</sup>Includes cumulative appreciation/depreciation on futures contracts and centrally cleared credit default swaps as reported in the applicable tables following the fund's investment portfolio. Only current day's variation margin is reported within the fund's statement of assets and liabilities.

Collateral – The fund receives or pledges highly liquid assets, such as cash or U.S. government securities, as collateral due to its use of futures contracts and credit default swaps. For futures contracts and centrally cleared credit default swaps, the fund pledges collateral for initial and variation margin by contract. The purpose of the collateral is to cover potential losses that could occur in the event that either party cannot meet its contractual obligation. Non-cash collateral pledged by the fund, if any, is disclosed in the fund's investment portfolio, and cash collateral pledged by the fund, if any, is held in a segregated account with the fund's custodian, which is reflected as pledged cash collateral in the fund's statement of assets and liabilities.

#### 6. Taxation and distributions

**Federal income taxation** – The fund complies with the requirements under Subchapter M of the Internal Revenue Code applicable to regulated investment companies and intends to distribute substantially all of its net taxable income and net capital gains each year. The fund is not subject to income taxes to the extent such distributions are made. Therefore, no federal income tax provision is required.

As of and during the period ended June 30, 2025, the fund did not have a liability for any unrecognized tax benefits. The fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the statement of operations. During the period, the fund did not incur any significant interest or penalties.

The fund's tax returns are generally not subject to examination by federal, state and, if applicable, non-U.S. tax authorities after the expiration of each jurisdiction's statute of limitations, which is typically three years after the date of filing but can be extended in certain jurisdictions.

Non-U.S. taxation – Dividend and interest income are recorded net of non-U.S. taxes paid. The fund may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. These reclaims are recorded when the amount is known and there are no significant uncertainties on collectability. Gains realized by the fund on the sale of securities in certain countries, if any, may be subject to non-U.S. taxes. The fund generally records an estimated deferred tax liability based on unrealized gains to provide for potential non-U.S. taxes payable upon the sale of these securities.

**Distributions** – Distributions determined on a tax basis may differ from net investment income and net realized gains for financial reporting purposes. These differences are due primarily to different treatment for items such as short-term capital gains and losses;

capital losses related to sales of certain securities within 30 days of purchase; cost of investments sold; net capital losses and income on certain investments. The fiscal year in which amounts are distributed may differ from the year in which the net investment income and net realized gains are recorded by the fund for financial reporting purposes.

As of June 30, 2025, the tax basis unrealized appreciation (depreciation) and cost of investments were as follows (dollars in thousands):

Gross unrealized appreciation on investment securities	\$ 4,894
Gross unrealized depreciation on investment securities	(472)
Net unrealized appreciation on investment securities	4,422
Cost of investments	229,640

Tax-basis distributions paid or accrued to shareholders from ordinary income were as follows (dollars in thousands):

Period ended June 30, 2025*
\$ 5
_†
5
1,893
_†
\$1,903

<sup>\*</sup>For the period April 29, 2025, commencement of operations, through June 30, 2025.

#### 7. Fees and transactions with related parties

CRMC, the fund's investment adviser, is the parent company of Capital Client Group, Inc. ("CCG"), the principal underwriter of the fund's shares, and American Funds Service Company® ("AFS"), the fund's transfer agent. CRMC, CCG and AFS are considered related parties to the fund.

**Investment advisory services** – The fund has an investment advisory and service agreement with CRMC that provides for monthly fees, accrued daily. These fees are based on an annual rate of 0.66% of daily net assets. Sub-advisory fees for the fund are paid by CRMC to KKR. The fund is not responsible for paying any sub-advisory fees.

Class-specific fees and expenses – Expenses that are specific to individual share classes are accrued directly to the respective share class. The principal class-specific fees and expenses are further described below:

Distribution services – The fund has plans of distribution for the share classes indicated below. Under the plans, the board of trustees approves certain categories of expenses that are used to finance activities primarily intended to sell fund shares and service existing accounts. The plans provide for payments, based on an annualized percentage of average daily net assets, ranging from 0.30% to 0.55% as noted in this section. In some cases, the board of trustees has limited the amounts that may be paid to less than the maximum allowed by the plans. All share classes with a plan may use up to 0.25% of average daily net assets to pay service fees, or to compensate CCG for paying service fees, to firms that have entered into agreements with CCG to provide certain shareholder services. The remaining amounts available to be paid under each plan are paid to dealers to compensate them for their sales activities.

Share class	Currently approved limits	Plan limits		
Class A	0.30%	0.30%		
Class A-2	0.55	0.75		

**Transfer agent services** – The fund has a shareholder services agreement with AFS under which the fund compensates AFS for providing transfer agent services to each of the fund's share classes. These services include recordkeeping, shareholder communications and transaction processing. Under this agreement, the fund also pays sub-transfer agency fees to AFS. These fees are paid by AFS to third parties for performing transfer agent services on behalf of fund shareholders.

<sup>&</sup>lt;sup>†</sup>Amount less than one thousand.

Administrative services – The fund has an administrative services agreement with CRMC under which the fund compensates CRMC for providing administrative services to all share classes. Administrative services are provided by CRMC and its affiliates to help assist third parties providing non-distribution services to fund shareholders. These services include providing in-depth information on the fund and market developments that impact fund investments. Administrative services also include, but are not limited to, coordinating, monitoring and overseeing third parties that provide services to fund shareholders. The agreement provides the fund the ability to charge an administrative services fee at the annual rate of 0.05% of the average daily net assets attributable to each share class of the fund. Currently the fund pays CRMC an administrative services fee at the annual rate of 0.03% of the average daily net assets attributable to each share class of the fund for CRMC's provision of administrative services.

For the period ended June 30, 2025, class-specific expenses under the agreements were as follows (dollars in thousands):

Share class	Distribution services	Transfer agent services	Administrative services	
Class A	\$-*	\$-*		
Class A-2	_	_*	_*	
Class F-2	Not applicable	_*	_*	
Class F-3	Not applicable	_*	11	
Class R-6	Not applicable	_*	_*	
Total class-specific expenses	<del>\$_</del> *	\$1	\$11	

<sup>\*</sup> Amount less than one thousand.

Miscellaneous fee reimbursement – The fund has an expense limitation agreement with CRMC and KKR under which CRMC and KKR have agreed to reimburse the fund to the extent certain fund offering and operating expenses exceed 0.20% of the average daily net assets of each share class ("expense limit"). The expense limit is calculated on a class-by-class basis and is exclusive of (i) advisory fees, including sub-advisory fees and administrative services fees, (ii) distribution or shareholder servicing fees, (iii) transfer agency fees, (iv) certain portfolio transaction and other investment-related costs, (v) interest expense and other financing costs, (vi) taxes, (vii) acquired fund fees and expenses, (viii) litigation and indemnification expenses, (ix) judgments, and (x) extraordinary expenses. For the period April 29, 2025, commencement of operations, through June 30, 2025, total fees and expenses reimbursed were \$284,000. Any portion of such reimbursements may be recouped by CRMC and/or KKR.

**Organizational and initial offering expenses** – CRMC and KKR have agreed to bear the organizational and initial offering expenses incurred with respect to the fund. CRMC and KKR do not intend to recoup these expenses.

Accounting and administrative services – The fund has a sub-administration agreement with Bank of New York ("BNY") under which the fund compensates BNY for providing accounting and administrative services to each of the fund's share classes. These services include, but are not limited to, fund accounting (including calculation of net asset value), financial reporting and tax services. BNY is not a related party to the fund.

Trustees deferred compensation – The board of trustees has adopted a deferred compensation plan. Trustees who are unaffiliated with CRMC may elect to defer the cash payment of part or all of their compensation. These deferred amounts, which remain as liabilities of the fund, are treated as if invested in shares of the fund or other Capital Group Funds. These amounts represent general, unsecured liabilities of the fund and vary according to the total returns of the selected funds.

**Affiliated officers and trustees** – Officers and certain trustees of the fund are or may be considered to be affiliated with CRMC, CCG and AFS. No affiliated officers or trustees will receive any compensation directly from the fund.

**Investment in CCF** – The fund holds shares of CCF, an institutional prime money market fund managed by CRMC. CCF invests in high-quality, short-term money market instruments. CCF is used as the primary investment vehicle for the fund's short-term instruments. CCF shares are only available for purchase by CRMC, its affiliates, and other funds managed by CRMC or its affiliates, and are not available to the public. CRMC does not receive an investment advisory services fee from CCF.

#### 8. Indemnifications

The fund's organizational documents provide board members and officers with indemnification against certain liabilities or expenses in connection with the performance of their duties to the fund. In the normal course of business, the fund may also enter into contracts that provide general indemnifications. The fund's maximum exposure under these arrangements is unknown since it is dependent on future

claims that may be made against the fund. The risk of material loss from such claims is considered remote. Insurance policies are also available to the fund's board members and officers.

#### 9. Capital share transactions

Capital share transactions in the fund were as follows (dollars and shares in thousands):

	Sale	Reinvest distrib		Repurc	hases <sup>1</sup>	Net increase (decrease)		
Share class	Amount	Shares	Amount	Shares	Amount	Shares	Amount	Shares
For the period April 29, 2025 <sup>2</sup> throu	igh June 30, 2025							
Class A	\$ 1,451	143	\$1	_3	\$-	_	\$ 1,452	143
Class A-2	10	1	_	_	_	_	10	1
Class F-2	1,357	134	4	_3	_	_	1,361	134

Class R-6	10	1	_	_	_	_	10	1
Total net increase (decrease)	\$229,953	22,899	\$5	_3	<u>\$</u>	_	\$229,958	22,899

<sup>&</sup>lt;sup>1</sup>Includes exchanges between share classes of the fund.

#### 10. Repurchase offers

As a closed-end interval fund, in order to provide liquidity to fund shareholders, the fund conducts periodic repurchase offers of 5% to 25% of its outstanding shares at net asset value. The fund currently conducts quarterly repurchase offers for 10% of its outstanding shares under ordinary circumstances, subject to approval of the board of trustees. Repurchases generally are funded from available cash (including through borrowings), cash from the sale of shares or sales of portfolio securities. While the fund believes repurchases are generally beneficial to shareholders, repurchase offers and the need to fund repurchase obligations may affect the ability of the fund to be fully invested, which may reduce returns. In addition, diminution in the size of the fund through repurchases without offsetting new sales, may result in untimely sales of portfolio securities (with imputed transaction costs, which may be significant) and a higher expense ratio, and may limit the ability of the fund to participate in new investment opportunities. The fund may also sell portfolio securities to meet repurchase obligations which, in certain circumstances, may adversely affect the market for loans and reduce the fund's value. Notwithstanding the foregoing, it is the investment adviser's intention to fund repurchases with the proceeds of borrowings whenever practical. The aggregate amount of the fund's borrowings will be limited to one-third of the total assets of the fund on an aggregate basis, immediately after such borrowings. The fees and expenses of borrowings will be borne entirely by the shareholders of the fund and will reduce the investment return of the shares.

The fund will initially make quarterly repurchase offers. The date on which the repurchase price for shares is determined will occur no later than the 14th day after the repurchase request deadline (or the next business day, if the 14th day is not a business day). When a repurchase offer commences, the fund sends written notice to each shareholder at least 21 business days before the repurchase request deadline. The purchase price will be the net asset value of the fund as determined at the close of business on the repurchase pricing date.

In the event a repurchase offer is oversubscribed, the fund may repurchase, but is not required to repurchase, additional shares up to a maximum amount of 2% of the outstanding shares of the fund in any three-month period. If the fund determines not to repurchase additional shares beyond the repurchase offer amount, or if shareholders request that the fund repurchase an amount of shares greater than that which the fund is entitled to repurchase, the fund will repurchase such shares on a pro rata basis.

During the period April 29, 2025, commencement of operations, through June 30, 2025, the fund did not conduct any repurchase offers.

#### 11. Investment transactions

The fund engaged in purchases and sales of investment securities, excluding short-term securities and U.S. government obligations, if any, of \$202,187,000 and \$3,316,000, respectively, during the period April 29, 2025, commencement of operations, through June 30, 2025.

<sup>&</sup>lt;sup>2</sup>Commencement of operations.

<sup>&</sup>lt;sup>3</sup>Amount less than one thousand.

#### 12. Ownership concentration

At June 30, 2025 each of CRMC and KKR held 35% of the fund's outstanding shares. The ownership represents the seed money invested in the fund prior to the fund's commencement of operations.

<sup>&</sup>lt;sup>1</sup>Based on average shares outstanding.

<sup>&</sup>lt;sup>2</sup>This column reflects the impact of certain waivers and/or reimbursements from CRMC and/or AFS, if any.

<sup>&</sup>lt;sup>3</sup>Not annualized.

<sup>&</sup>lt;sup>4</sup>Total returns exclude any applicable sales charges, including contingent deferred sales charges.

<sup>&</sup>lt;sup>6</sup>Ratios do not include expenses of any Central Funds. The fund indirectly bears its proportionate share of the expenses of any Central Funds.

<sup>&</sup>lt;sup>7</sup>For the period April 29, 2025, commencement of operations, through June 30, 2025.

<sup>&</sup>lt;sup>8</sup>Based on operations for a period that is less than a full year.

<sup>10</sup> All or a significant portion of assets in this class consisted of seed capital invested by CRMC and/or KKR. Certain fees (including, where applicable, fees for distribution services) are not charged or accrued on these seed capital assets. If such fees were paid by the fund on seed capital assets, fund expenses would have been higher and net income and total return would have been lower.

<sup>&</sup>lt;sup>11</sup>Amount less than \$1 million.

<sup>&</sup>lt;sup>12</sup>Rates do not include the fund's portfolio activity with respect to any Central Funds.

# Approval of Investment Advisory and Service Agreement and Subadvisory Agreement

The fund's board, including a majority of its independent board members, has approved the fund's Investment Advisory and Service Agreement (the "advisory agreement") with Capital Research and Management Company ("CRMC") and the Subadvisory Agreement (the "subadvisory agreement") between CRMC and KKR Credit Advisors (US) LLC ("KKR"), each for an initial term through January 31, 2027. Each of the advisory agreement and subadvisory agreement are referred to herein as an "agreement" and jointly as the "agreements." The board approved each agreement following the recommendation of the fund's Contracts Committee (the "committee"), which is composed of all the fund's independent board members. The board and the committee determined in the exercise of their business judgment that approving each agreement was in the best interests of the fund and its shareholders.

In reaching their decision with respect to each agreement, the board and the committee took into account information prepared specifically in connection with their review of the agreements and information otherwise provided in the meeting material, as well as information previously provided to them in their capacity as board members of other investment companies managed by CRMC, and they were advised by their independent counsel with respect to the matters considered. Each member of the board and the committee was satisfied that all information reasonably necessary for their consideration of the agreements had been provided and that the totality of the information available was sufficient. They considered the following factors, among others, but did not identify any single issue or particular piece of information that, in isolation, was the controlling factor, and each board and committee member did not necessarily attribute the same weight to each factor.

#### 1. Nature, extent and quality of services

The board and the committee considered the depth and quality of CRMC's investment management process, including its global research capabilities; the experience, capability and integrity of its senior management and other personnel; the low turnover rates of its key personnel; the overall financial strength and stability of CRMC and the Capital Group organization; the resources and systems CRMC devotes to investment management, financial, investment operations, compliance, trading, proxy voting, shareholder communications and other services; and the ongoing evolution of CRMC's organizational structure designed to maintain and strengthen these qualities. The board and the committee considered the manner in which the fund's hybrid portfolio will be managed and overseen by CRMC, including overall cash and liquidity management in connection with the fund's quarterly repurchase offers; the nature, extent and quality of the oversight of KKR's services that would be provided by CRMC; the administrative and shareholder services that would be provided by CRMC to the fund under the agreement and other agreements; the oversight of other third party service providers to be provided by CRMC; and the benefits to fund shareholders from investing in a fund that is part of a large family of funds. The board and the committee considered the risks assumed by CRMC in providing services to the fund, including operational, business, financial, reputational, regulatory and litigation risks.

The board and committee also considered the depth and quality of KKR's investment management process, including its global research capabilities and its experience in private market investing; the experience, capability and integrity of its senior management and other personnel; and the services that would be provided to the fund under the subadvisory agreement.

The board and the committee each concluded that it was satisfied with the nature, extent and quality of the services to be provided by CRMC and KKR to the fund, and that such services would benefit the fund and its shareholders.

#### 2. Investment results

The board and the committee considered the manner in which CRMC proposed to manage the fund in light of its objective and strategy. They also considered the proposed investment policies and restrictions on the fund, and CRMC's and KKR's experience in managing similar strategies. As the fund was newly created, there was no fund performance for the board and the committee to review. The board and committee did, however, consider investment performance information for each of CRMC and KKR with respect to existing accounts with strategies most similar to those that will be employed by CRMC and KKR for the fund. On the basis of this evaluation and the board's and the committee's plan to undertake an ongoing review of investment operations and results, the board and the committee each concluded that it was satisfied with the investment results that could be reasonably anticipated from each of CRMC and KKR given the information available.

#### 3. Advisory and subadvisory fees and total expenses

The board and the committee reviewed the proposed advisory and subadvisory fee schedules of the fund compared to those of other relevant funds and accounts and noted CRMC's agreement to establish the initial advisory fee rate assuming fund assets of a reasonable size. The board noted the proposed expense limitation agreement between CRMC, KKR and the fund pursuant to which CRMC and KKR have agreed to limit a portion of the offering and operating expenses of the fund by reimbursing the fund to the extent that such expenses (subject to certain exclusions) exceed 0.20% of the fund's average daily net assets and, separately, that pursuant to the subadvisory agreement, CRMC would pay the fees due to KKR as sub-adviser to the fund out of its own advisory fee.

The board and the committee concluded that each of the advisory fees payable by the fund to CRMC, including the portion of such fee to be retained by CRMC after payment of the subadvisory fee, and the subadvisory fee payable by CRMC to KKR was fair and reasonable in relation to the services to be provided by CRMC and KKR, respectively, as well as in relation to the respective risks assumed by CRMC and/or KKR in sponsoring and managing the fund. The board and the committee also concluded that the fund's total expense ratio was fair and reasonable.

#### 4. Ancillary benefits

The board and the committee considered a variety of other benefits that CRMC and its affiliates receive as a result of CRMC's proposed relationship with the fund and other funds it sponsors, including fees for administrative services provided to certain share classes; fees paid to CRMC's affiliated transfer agent; sales charges and distribution fees received and retained by the fund's principal underwriter, an affiliate of CRMC; and possible ancillary benefits to CRMC and its institutional management affiliates in managing other investment vehicles. The board and the committee reviewed CRMC's portfolio trading practices related to the portion of fund assets it would directly manage, noting that CRMC bears the cost of third-party research. The board and the committee also noted that CRMC benefited from the use of commissions from portfolio transactions made on behalf of the fund to facilitate payments to certain broker-dealers for research to comply with regulatory requirements applicable to these firms, with all such amounts reimbursed to the fund by CRMC. The board and the committee also considered the expected ancillary benefits to CRMC resulting from CRMC's partnership with KKR. The board and the committee took these ancillary benefits into account in evaluating the reasonableness of the advisory fees and other amounts paid to CRMC by the fund under the agreement and concluded that such amounts were fair and reasonable.

The board and the committee separately considered a variety of other benefits that KKR and its affiliates may receive as a result of KKR's proposed relationship as sub-adviser to the fund, including indirect benefits relating to the fund's ability to co-invest in certain privately negotiated transactions (including investments originated and directly negotiated by KKR or its affiliates) in accordance with KKR's co-investment order and certain economic benefits from providing capital markets solutions in transactions alongside the fund. The board and the committee noted that KKR does not expect to receive any proprietary or third-party service benefits, including research and brokerage-related products, in exchange for its brokerage business. The board and the committee also considered the expected ancillary benefits to KKR resulting from KKR's partnership with CRMC. The board and the committee took these potential ancillary benefits into account in evaluating the reasonableness of subadvisory fees paid to KKR by CRMC under the subadvisory agreement and concluded that such amounts were fair and reasonable.

#### 5. Adviser and sub-adviser financial information

The board and the committee reviewed information regarding CRMC's and KKR's respective commitments to provide the fund the necessary resources, including personnel, systems and resources of investment, compliance, trading, accounting and other administrative operations.

Specific to CRMC, they considered costs and related cost allocation methodology as well as CRMC's track record of investing in technology, infrastructure and staff to maintain and expand services and capabilities, to respond to industry and regulatory developments, and to attract and retain qualified personnel. They noted information regarding the compensation structure for CRMC's investment professionals. They reviewed information on the profitability of the investment adviser and its affiliates. The board and the committee also compared CRMC's profitability and compensation data to the reported results and data of several large, publicly held investment management companies. The board and the committee noted the competitiveness and cyclicality of both the registered fund industry and the capital markets, and the importance in that environment of CRMC's long-term profitability for maintaining its independence, company culture and management continuity. They further considered the fund's advisory fee structure and CRMC's sharing of potential economies of scale, or efficiencies, through breakpoints and other fee reductions, including potential fee waivers, and costs voluntarily absorbed.

Specific to KKR, they considered fees and profitability including comparative fees, potential fee waivers, potential direct or indirect benefits, and profitability metrics.

The board and the committee concluded that the anticipated profitability of the fund to each of CRMC and KKR was reasonable and reflected a reasonable sharing of benefits between CRMC and/or KKR, on the one hand, and the fund's shareholders, on the other.

"Capital Group Proxy Voting Procedures and Principles" – which describes how the fund's investment adviser votes proxies of securities held in the portion of the fund managed by the investment adviser – is available on the Capital Group website or upon request by calling AFS. The sub-adviser votes proxies of securities held in the portion of the fund it manages. The sub-adviser's proxy voting policy is designed to ensure that all proxies are voted in the best interest of the sub-adviser's clients, to provide disclosure of the sub-adviser's proxy voting records, and to ensure that certain documentation is retained. To assist it in its proxy-voting responsibilities, the sub-adviser subscribes to proxy-related services offered by Institutional Shareholder Services, Inc. ("ISS"), which provides the sub-adviser with independent analysis and recommendation with respect to proxy proposals that the sub-adviser votes on behalf of its clients. The sub-adviser retains ultimate voting discretion with respect to its clients and may depart from an ISS recommendation in order to avoid voting decisions believed to be contrary to the best interests of its clients. The sub-adviser may be subject to conflicts of interest in the voting of proxies. If at any time the sub-adviser becomes aware of an existing or potential conflict of interest relating to a particular proxy proposal, the sub-adviser's conflicts committee, or its designee, must be notified. The fund files its proxy voting record with the U.S. Securities and Exchange Commission (SEC) for the 12 months ended June 30 by August 31. The proxy voting record is available free of charge on the SEC website at sec.gov or on our website or by calling AFS.

Capital Group KKR Multi-Sector+ files a complete list of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form NPORT-P. The list of portfolio holdings is available free of charge on the SEC website and on our website.
