

Retirement plan investments quarterly statistical update

Share Class R-5

Data as of March 31, 2025, unless otherwise noted.

CAPITAL GROUP® | **AMERICAN FUNDS®**

Figures shown are past results and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Investing for short periods makes losses more likely. Prices and returns will vary, so investors may lose money. For current information and month-end results, visit americanfundsretirement.com.

Returns will vary, so investors may lose money. (American Funds U.S. Government Money Market Fund)

The following funds are offered without a sales charge to eligible retirement plans. Please refer to each fund's most recent prospectus for details.

For money market funds, the annualized 7-day SEC yield more accurately reflects the fund's current earnings than does the fund's return.

You could lose money by investing in American Funds U.S. Government Money Market Fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor is not required to reimburse the fund for losses, and you should not expect that the sponsor will provide financial support to the fund at any time, including during periods of market stress.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

Investments in mortgage-related securities involve additional risks, such as prepayment risk.

The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds.

Interests in Capital Group's U.S. Government Securities portfolios are not guaranteed by the U.S. government.

Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds.

The return of principal for bond portfolios and for portfolios with significant underlying bond holdings is not guaranteed. Investments are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings.

While not directly correlated to changes in interest rates, the values of inflation-linked bonds generally fluctuate in response to changes in real interest rates and may experience greater losses than other debt securities with similar durations.

The value of fixed income securities may be affected by changing interest rates and changes in credit ratings of the securities.

Frequent and active trading of American Funds Strategic Bond Fund's portfolio securities may occur, which may involve correspondingly greater transaction costs, adversely affecting the results.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.

Nondiversified funds have the ability to invest a larger percentage of assets in the securities of a smaller number of issuers than a diversified fund. As a result, poor results by a single issuer could adversely affect fund results more than if the fund invested in a larger number of issuers. See the applicable prospectus for details.

Smaller company stocks entail additional risks, and they can fluctuate in price more than larger company stocks.

Although the target date portfolios are managed for investors on a projected retirement date time frame, the allocation strategy does not guarantee that investors' retirement goals will be met. Investment professionals manage the portfolio, moving it from a more growth-oriented strategy to a more income-oriented focus as the target date gets closer. The target date is the year that corresponds roughly to the year in which an investor is assumed to retire and begin taking withdrawals. Investment professionals continue to manage each portfolio for approximately 30 years after it reaches its target date. Payments consisting of return of capital will result in a decrease in an investor's fund share balance. Higher rates of withdrawal and withdrawals during declining markets may result in a more rapid decrease in an investor's fund share balance. Persistent returns of capital could ultimately result in a zero account balance.

Allocations may not achieve investment objectives. The portfolios' risks are related to the risks of the underlying funds as described herein, in proportion to their allocations.

American Funds U.S. Government Money Market Fund may suspend 12b-1 payments under agreements between its principal underwriter and intermediaries and other entities that sell fund shares. To the extent such payments have been suspended for a certain share class, should payments subsequently commence, the fund's investment results would be lower and expenses would be higher for that share class. Please refer to the prospectus for additional information.

Capital Group offers a range of share classes designed to meet the needs of retirement plan sponsors and participants. The different share classes incorporate varying levels of financial professional compensation and service provider payments.

All Capital Group trademarks mentioned are owned by The Capital Group Companies, Inc., an affiliated company or fund. All other company and product names mentioned are the property of their respective companies.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses.

When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower and net expenses higher. For more information on fee waivers and expense reimbursements, visit americanfundsretirement.com.

For the American Funds Corporate Bond Fund share class(es) listed below, the investment adviser has agreed to reimburse a portion of fund expenses through the date(s) listed below, without which results would have been lower and net expenses higher.

- Class R-5 shares (expiration: 8/1/2025)

The investment adviser may elect at its discretion to extend, modify or terminate the reimbursements as of any noted expiration date. Please refer to the fund's most recent prospectus for details.

For Class R-5 shares of the funds listed below, the investment adviser has agreed to waive a portion of fund expenses through the date(s) listed below, without which results would have been lower and net expenses higher.

- American Funds Mortgage Fund (expiration: 11/1/2025)
- The Bond Fund of America (expiration: 3/1/2026)
- U.S. Government Securities Fund (expiration: 11/1/2025)
- Intermediate Bond Fund of America (expiration: 11/1/2025)

The investment adviser may elect at its discretion to extend, modify or terminate the waiver as of any noted expiration date. Please refer to the fund's most recent prospectus for details.

Certain share classes were offered after the inception dates of some funds. Results for these shares prior to the dates of first sale are hypothetical based on the original share class results without a sales charge, adjusted for typical estimated expenses.

- Class R-5 shares were first offered on 5/15/2002.

Results for certain funds with an inception date after the share class inception also include hypothetical returns because those funds' shares sold after the funds' date of first offering. View dates of first sale and specific expense adjustment information at capitalgroup.com.

1. When applicable, returns for less than one year are not annualized, but calculated as cumulative total returns.

2. Expense ratios are as of each fund's prospectus/characteristics statement available at the time of publication. The expense ratio for American Funds® 2070 Target Date Retirement Fund is estimated.

Yield Annualized 7-day SEC: The 7-day SEC yield is calculated by annualizing dividends paid over the past seven days. Compared with returns, the 7-day SEC yield more accurately reflects the fund's current earnings. If shown, the net 7-day SEC yield reflects waivers/reimbursements; the gross yield does not reflect waivers/reimbursements.
