

American Funds managed portfolios

Designed to help keep your investments on track

For over 90 years, Capital Group, home of American Funds, has offered professionally managed mutual funds that feature in-depth global research, seasoned managers and a philosophy of long-term investing. American Funds Portfolio Series and American Funds Retirement Income Portfolio Series are carefully monitored by our Portfolio Solutions Committee, a team of seven investment professionals who average 30 years of investment industry experience.* The funds in the American Funds Target Date Retirement Series® and American Funds College Target Date Series® are managed by our Target Date Solutions Committee, a team of eight investment professionals who average 30 years of investment industry experience.*

Built with the care you've come to expect from Capital Group

- Management fees. While some funds of funds charge management fees, American Funds managed portfolios do not.
- Extensive research and testing. Decisions are based on thorough, ongoing research.
- Closely monitored. If necessary, the Portfolio Solutions and Target Date Solutions Committees may adjust the portfolio's underlying funds and allocations to pursue the portfolio's objectives.
- American Funds and Capital Group ETFs. These are the same funds trusted by many investors and their financial professionals.

Created to align with your objectives

American Funds managed portfolios take into account investors' goals, objectives, time horizons and appetite for risk. This approach provides you with a number of choices in tailoring investments to pursue specific goals, such as saving for college and retirement, reducing taxes and generating income in retirement.

Real-life investment goals

These objective-based portfolios allow investors to pursue a wide range of real-life goals based on time frame, risk tolerance and other factors.

- American Funds Portfolio Series
- American Funds
 Insurance Series® Portfolio Series
- American Funds Retirement Income Portfolio Series

Time-based goals

These funds pursue a goal at a fixed point in the future, such as college or retirement. As the target date nears, managers slowly and carefully replace growth funds with dividend-focused equity and fixed income funds to reduce volatility and help preserve assets:

- American Funds Target Date Retirement Series
- American Funds College Target Date Series

*Number of committee members and years of investment industry experience are as of each fund's most recent prospectus.

We also offer 19 objective-based model portfolios – 11 of which have the same strategic underlying fund allocations as American Funds managed portfolios. To find out how our model portfolios can help investors, visit <u>capitalgroup.com/modelportfolios</u>.

Proven teams of investment professionals with client goals in mind

The investment professionals that manage our portfolio series and target date funds have decades of investment industry experience, and many of the investment professionals have experience managing the underlying funds. Both committees take an objective-based approach to portfolio construction, keeping client goals squarely in mind as they review and manage these offerings. To ensure transparency and continuity between the two committees, some of the investment professionals are members of both committees. The two committees also work closely with the Capital Solutions Group, a dedicated investment unit supporting all multi-asset solutions research, analysis and underlying fund and strategy allocations.

Capital Group Portfolio Solutions Committee

The Portfolio Solutions Committee is responsible for the oversight of the American Funds Portfolio Series, American Funds Retirement Income Portfolio Series and other wealth management solutions not tied to a specific time frame or glide path. This team monitors the results and makes all the decisions around asset allocation in the series' underlying funds.

American Funds Portfolio Series

The objective-based framework for the American Funds Portfolio Series mirrors the way investors view and handle their personal finances. This approach allows them to divide their assets based on their needs and goals. The underlying funds in each of these portfolios were carefully selected and tested to pursue real-life investment objectives.

American Funds Retirement Income Portfolio Series

Designed as a withdrawal source for a retiree's lifestyle – or discretionary – spending needs, these three portfolios are intended to be used in concert with the retiree's other assets. They seek to preserve as much of the initial investment as possible, even as the investor takes regular distributions.

Income

American Funds Retirement Income Portfolio – Enhanced

Seeks current income, long-term growth of capital and conservation of capital, with an emphasis on income and growth of capital to support sustained, inflation-adjusted withdrawals.

3.75%-4.50% Suggested annual withdrawal rate range*

Portfolios are managed, so holdings will change. Visit <u>capitalgroup.com</u> for current allocations.

The expense ratios are as of each fund's prospectus available at the time of publication.

The Retirement Income Portfolio Series allocations may not achieve investment objectives, and adequate income through retirement is not guaranteed. The portfolios' risks are directly related to the risks of the underlying funds. For more information about the risks associated with each underlying fund, refer to the fund's prospectus. Payments consisting of return of capital will result in a decrease in an investor's fund share balance. Higher rates of withdrawal and withdrawals during declining markets may result in a more rapid decrease in an investor's fund share balance. Persistent returns of capital could ultimately result in a zero account balance.

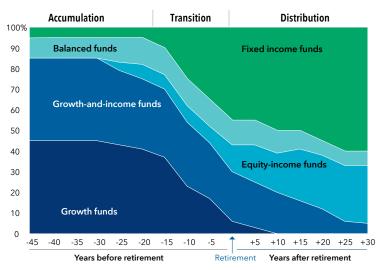

Financial professionals should check with their home offices for share class availability.

^{*}Percent of initial investment.

American Funds Target Date Retirement Series

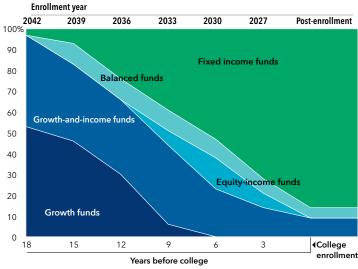

American Funds Target Date Retirement Series and American Funds College Target Date Series provide diversification in a single, easy-to-use investment. The allocation of each gradually transitions from a growth-oriented focus to income and preservation of capital as the fund approaches and passes its target date.

The target date for the College Target Date Series is the year that corresponds roughly to the year in which the beneficiary is expected to begin taking withdrawals. Investment professionals gradually adjust the portfolio over time so that it becomes more preservation-oriented. The allocation strategy does not guarantee that investors' education savings goals will be met. Investors and their financial professionals should periodically evaluate their investment to determine whether it continues to meet their needs. The nearest dated fund merges with the College Enrollment Fund when it reaches its target enrollment date.

*Effective January 1, 2026, American Funds 2010 Target Date Retirement Fund will be renamed American Funds 2010 Target Date Retirement Income Fund; American Funds 2015 Target Date Retirement Fund will be renamed American Funds 2015 Target Date Retirement Income Fund; American Funds 2020 Target Date Retirement Fund will be renamed American Funds 2020 Target Date Retirement Income Fund; and American Funds 2025 Target Date Retirement Fund will be renamed American Funds 2025 Target Date Retirement Fund.

Although the target date portfolios for the Target Date Retirement Series are managed for investors on a projected retirement date time frame, the allocation strategy does not guarantee that investors' retirement goals will be met. Investment professionals manage the portfolio, moving it from a more growth-oriented strategy to a more income-oriented focus as the target date gets closer. The target date is the year that corresponds roughly to the year in which an investor is assumed to retire and begin taking withdrawals. Investment professionals continue to manage each portfolio for approximately 30 years after it reaches its target date. The target allocations shown for the Target Date Retirement Series and the College Target Date Series are as of September 30, 2025, and are subject to the oversight committee's discretion. The investment adviser anticipates that assets will be invested within a range that deviates no more than 10% above or below the allocations shown in the prospectus. Underlying funds may be added or removed during the year. Visit capitalgroup.com for current allocations. Allocations may not achieve investment objectives. The portfolios' risks are related to the risks of the underlying funds as described herein, in proportion to their allocations. For more information about the risks associated with each underlying fund, refer to the fund's prospectus. Financial professionals should check with their home offices for share class availability.

The Capital System™

Since 1931, Capital Group has helped investors pursue long-term investor success. Our distinctive investment approach – The Capital System – is designed to deliver superior investment results. It rests on three pillars:

Collaborative research

Our portfolio managers, analysts, economists and quantitative research teams closely collaborate on our research process – sharing and debating ideas. This collaboration generates deeper insights that inform our portfolios.

Diverse perspectives

Most portfolios have multiple portfolio managers, each of whom invests part of the portfolio in their strongest individual convictions. Combining these diverse investment approaches into a single portfolio helps us pursue more consistent results, with less volatility.

Long-term view

Investment professionals invest with a long-term view, which we believe aligns our goals with the interests of our clients. Managers are rewarded more for their long-term results, and most personally invest in the funds they manage. Our fund management fees are among the lowest in the industry.

A history of strong investment results

Over the past 40 years, **74**% of funds outpaced more than half of their respective peers when comparing average 10-year rolling returns. And **71**% had higher risk-adjusted returns (as indicated by the Sharpe ratio⁴) over that same time frame.⁵

- ¹ Compensation paid to our investment professionals is heavily influenced by results over one-, three-, five- and eight-year periods, with increasing weight placed on each succeeding measurement period to encourage a long-term investment approach.
- ² Ninety-seven percent of American Funds® assets are invested in mutual funds in which at least one manager has invested more than \$1 million. Source: Morningstar. Data as of 2/15/25.
- ³ On average, our mutual fund management fees were in the lowest quintile 49% of the time, based on the 20-year period ended December 31, 2024, versus comparable Lipper categories, excluding funds of funds.
- ⁴ Sharpe ratio uses standard deviation (a measure of volatility) and return in excess of the risk-free rate to determine reward per unit of risk. The higher the number, the better the portfolio's historical risk-adjusted performance.
- ⁵ Methodology: Data as of 12/31/24. Based on a comparison of each fund with its respective Morningstar category peers. Data are based on the following mutual fund share classes: Class F-2, Class M, Class 529-A, Class 1, Class P-2 and Class 4. One share class was used per fund. The analysis uses Morningstar hypothetical methodology to calculate hypothetical fund results for periods before a share class's inception. For those periods, Morningstar uses results for the oldest share class (unless the newer share class is more expensive). Source: Capital Group, based on mutual fund data from Morningstar. For each fund, we calculated the average rolling Sharpe ratio and return over the 40-year period (or the fund's lifetime, if it lacks a 40-year history). That average rolling return and Sharpe ratio were compared against the equivalent averages for each fund's respective Morningstar peers on a percentile basis. Rolling returns are calculated monthly.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

There have been periods when the funds have lagged their indexes.

Capital Group manages equity assets through three investment groups. These groups make investment and proxy voting decisions independently. Fixed income investment professionals provide fixed income research and investment management across the Capital organization; however, for securities with equity characteristics, they act solely on behalf of one of the three equity investment groups.
