Qualified dividends

The funds that invest in stocks of certain corporations will pay qualified dividends, which are taxed at a maximum rate of 23.8% (including the 3.8% Medicare tax). Some funds did not pay qualified dividends because all of their income is from bonds, money market instruments and other non-dividend-paying investments. All taxable dividends paid by these funds will be taxed at the ordinary income rates.

To be eligible for the reduced tax rates on a qualified dividend, investors must have held the shares on which the dividend was paid for a specific holding period. You can find more information on qualified dividends and other tax topics on capitalgroup.com/taxes.

Information on dividends and capital gain distributions is also available at capitalgroup.com, by calling (800) 421-4225, and on account statements and Form 1099-DIV.

Return of capital

A portion of the income dividends distributed by American Funds Emerging Markets Bond Fund and American Funds Strategic Bond Fund during 2024 was classified as a return of capital. Refer to “Form 8937: Report of Organizational Actions” in our Tax Center at capitalgroup.com/taxes for more information. The actual amount of return of capital will be reported in Box 3 “Nondividend Distributions” of the 2024 1099-DIV (available late January).

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.
