

Equity-focused mutual funds with enduring, index-beating lifetime results

Proponents of index investing claim it is nearly impossible to beat the index over the long term. Yet, nearly all of our equity-focused American Funds, offered by Capital Group, have generated index-beating lifetime results, even though there have been times when the funds lagged their indexes.

EXHIBIT DETAILS

Shows lifetime annual returns of our 20 equity-focused funds as of December 31, 2024, including our first fund that was launched in 1934.

Figures shown are past results for Class A shares and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. Returns shown are at net asset value and do not reflect a sales charge. If the maximum applicable 5.75% sales charge had been deducted, results would have been lower. For current information and month-end results, visit capitalgroup.com.

*Effective June 1, 2025, EuroPacific Growth Fund® is now EUPAC Fund.

⁺Time-weighted average annual excess return across our 20 equity-focused American Funds. The equal-weighted average annual excess return is 0.90 percentage points. The time-weighted average gives greater emphasis to those funds that have been in existence longer. For example, this means that the 1.06 percentage-point annualized difference between The Investment Company of America and its benchmark is given proportionally greater weighting in alignment with its more than 90 years in existence when calculating the average across all 20 funds. Returns are average annual total returns for benchmark indexes and average annual returns for funds at net asset value from fund inception through 12/31/24. Refer to the next page for a list of the

Past results are not predictive of results in future periods.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. The expense ratios are as of each fund's prospectus available at the time of publication. When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Visit capitalgroup.com for more information.

For American Funds Global Insight Fund and American Fund International Vantage Fund, Class A shares were first offered on November 8, 2019. Class A share results prior to the date of first sale are hypothetical based on the results of the original share class of the fund, adjusted for typical estimated expenses. Visit <u>capital group.com</u> for more information on specific expense adjustments and the actual dates of first sale.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries. Smaller-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks. The return of principal for bond portfolios and for portfolios with significant underlying bond holdings is not guaranteed. Investments are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds.

If used after June 30, 2025, this brochure must be accompanied by a current American Funds quarterly statistical update.
