A time-tested growth strategy built for navigating a variety of market environments

Simplified retirement plan menus with broader investment strategies can help 1) improve participant outcomes, 2) streamline the governance process for plan sponsors and 3) enable deeper due diligence.

The Growth Fund of America may fit this approach as a strategy that:

- Takes a flexible approach to growth investing with a focus on capital appreciation.
- Seeks opportunities in traditional growth stocks, cyclical companies and turnarounds with significant potential for growth of capital.

A long-term legacy of success

By December 31, 2024, an initial \$10,000 hypothetical investment made on December 31, 1978, when the Russell 1000 Growth Index began, would have grown to:

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

The market indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. There have been periods when the fund has lagged the indexes.

EuroPacific Growth is now EUPAC

In connection with recent amendments to the SEC's Names Rule, we changed EuroPacific Growth to EUPAC in the applicable strategy and vehicle names on June 1, 2025. Although the name changed, the investment process, approach and guidelines are the same.

We also changed the name of the EuroPacific Growth Fund Historical Benchmarks Index to EUPAC Fund Historical Benchmarks Index. The underlying linked indexes in this index are the same.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Use rolling periods to consider **success rate:** how often the fund outpaced peers/benchmarks; **excess returns:** the fund's average annualized return relative to that of peers/benchmarks; **resiliency:** after trailing, how often the fund came back to outpace peers/ benchmarks in the first subsequent period; and **after-trailing excess return:** the fund's average annualized return relative to that of peers/benchmarks in the first subsequent periods after trailing.

Past results are not predictive of future results.

Calculated by Capital Group based on data from Morningstar. For resiliency and after-trailing excess returns, subsequent periods start at the end of a trailing period; for example, if the fund trailed in the 10-year period ended 3/31/99, the subsequent period would be the period from 4/1/99 to 3/31/09. Resiliency and after-trailing excess return data does not include periods ended within the last three, five and 10 years because full subsequent periods were not available. "N/A" signifies that the fund did not lag over any periods or, if it did lag, no full subsequent periods were available.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. The expense ratio is as of the fund's prospectus available at the time of publication. When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Refer to <u>capitalgroup.com</u> for more information.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries.

We offer a range of share classes designed to meet the needs of retirement plan sponsors and participants. The different share classes incorporate varying levels of advisor compensation and service provider payments. Because Class R-6 shares do not include any recordkeeping payments, expenses are lower and results are higher. Other share classes that include recordkeeping costs have higher expenses and lower results than Class R-6. Class R-6 shares were first offered on May 1, 2009. Class R-6 share results prior to the date of first sale are hypothetical based on results of the original share class of the fund without a sales charge, adjusted for typical estimated expenses. Refer to the fund's prospectus for more information on specific expenses.

⁵As of January 29, 2025. The Morningstar Medalist Rating is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five-pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark over the long term on a risk adjusted basis. They consider quantitative and gualitative factors in their research. For actively managed strategies, people and process each receive a 45% weighting in their analysis, while parent receives a 10% weighting. For passive strategies, process receives an 80% weighting, while people and parent each receive a 10% weighting. For both active and passive strategies, performance has no explicit weight as it is incorporated into the analysis of people and process; price at the share-class level (where applicable) is directly subtracted from an expected gross alpha estimate derived from the analysis of the other pillars. The impact of the weighted pillar scores for people, process and parent on the final Analyst Rating is further modified by a measure of the dispersion of historical alphas among relevant peers. For certain peer groups where standard benchmarking is not applicable, primarily peer groups of funds using alternative investment strategies, the modification by alpha dispersion is not used. The Medalist Rating scale is Gold, Silver, Bronze, Neutral, and Negative. For active funds, a Morningstar Medalist Rating of Gold, Silver, or Bronze reflects the Manager Research Group's expectation that an active fund will be able to deliver positive alpha net of fees relative to the standard benchmark index assigned to the Morningstar category. The level of the rating relates to the level of expected positive net alpha relative to Morningstar category peers for active funds. For passive funds, a Morningstar Medalist Rating of Gold, Silver, or Bronze reflects the Manager Research Group's expectation that a fund will be able to deliver a higher alpha net of fees than the lesser of the relevant Morningstar category median or 0. The level of the rating relates to the level of expected net alpha relative to Morningstar category | Morningstar Analyst and Quantitative Rating Morningstar Essentials 31 peers for passive funds. For certain peer groups where standard benchmarking is not applicable, primarily peer groups of funds using alternative investment strategies, a Morningstar Medalist Rating of Gold, Silver, or Bronze reflects the Manager Research Group's expectation that a fund will deliver a weighted pillar score above a predetermined threshold within its peer group. Medalist Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. Morningstar's screening took into consideration expense ratios, manager ownership, returns over manager's tenure, and Morningstar Risk, Medalist and Parent ratings. The universe was limited to share classes accessible to individual investors with a minimum investment no greater than \$50,000, did not include funds of funds, and must be rated by Morningstar analysts. Class A shares were evaluated for American Funds. American Funds Target Date Retirement Series invests in Class R-6 shares of the underlying American Funds. Not all seven American Funds strategies are in each target date fund. Visit <u>morningstar.com</u> for more details.

Although target date portfolios are managed for investors on a projected retirement date time frame, the allocation strategy does not guarantee that investors' retirement goals will be met. Investment professionals manage the portfolio, moving it from a more growth-oriented strategy to a more incomeoriented focus as the target date gets closer. The target date is the year that corresponds roughly to the year in which an investor is assumed to retire and begin taking withdrawals. Investment professionals continue to manage each portfolio for approximately 30 years after it reaches its target date.
