

American Funds®
Model Portfolios at Morgan Stanley

Objective-based portfolios that pursue a variety of goals

**Seek better outcomes with
model portfolios built from
quality ingredients**

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Advisory services offered through Capital Research and Management Company (CRMC) and its RIA affiliates.

Our portfolios are backed by extensive capabilities ...

Experience matters

90+
Years helping
investors pursue
better outcomes

Total assets under management are as of 3/31/25.
All other data points are as of 12/31/24.
Assets under management are in USD.

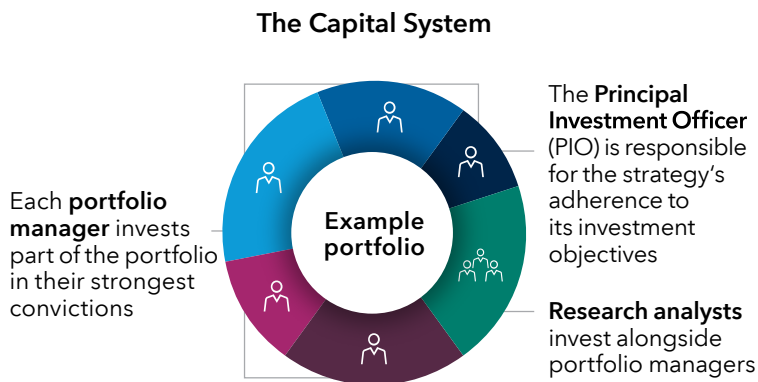

Leadership matters

... and strong active management

Investment process matters

The Capital System™ powers our pursuit of superior long-term investment results across asset classes. Each portfolio is divided among multiple investment professionals. We believe having multiple managers in a portfolio better positions us to deliver the strong results investors seek.

The benefits of our approach

- ✓ **Deeper insights:** Investment professionals develop their views leveraging research from multiple angles.
- ✓ **Broader diversification:** Portfolios reflect diverse perspectives, which can lead to more consistent results over multiple cycles.
- ✓ **High-conviction portfolios:** Portfolios reflect the highest individual convictions of multiple investment professionals.
- ✓ **No "key person" risk:** Our results don't rely on one manager always being right, and succession planning is embedded in the process.

Stewardship matters

We received a High Parent rating by Morningstar, reflecting an investment culture marked by lengthy tenures, strong manager fund ownership and competitive long-term results.¹

Investing with you matters

97%

of American Funds assets are invested in mutual funds in which at least one manager has invested more than \$1 million.²

Low cost matters

Many of our fund management fees are among the lowest in the industry.³

Source: Capital Group, based on Morningstar data.

¹Morningstar examined companies' cultures and ethical track records, along with the factors considered in its Morningstar Medalist Rating™ to determine rating for a fund company in one of five buckets: Low, Below Average, Average, Above Average, and High, with High being the best. Capital Group received a Parent rating of High as of January 2025. 6.4% of 172 firms analyzed also received the same rating as of that date. The parent pillar rating is a current view and is reflective of a firm's history, both recent and long-term. Capital Group did not compensate Morningstar for the ratings and comments contained in this material. However, the firm has paid Morningstar a licensing fee to access and publish its ratings data. The payment of this subscription fee does not give rise to a material conflict with Morningstar.

²Source: Morningstar. As of 2/19/25.

³On average, our mutual fund management fees were in the lowest quintile 49% of the time, based on the 20-year period ended 12/31/24, versus comparable Lipper categories, excluding funds of funds.

American Funds Moderate Growth	American Funds Moderate Growth and Income	American Funds Retirement Distribution Income – Moderate
	American Funds Tax-Aware Conservative Growth and Income	

*As of 12/31/24. Largest multi-asset manager calculated by Capital Group is based on data (total net assets of U.S. open-end mutual funds in all U.S. fund allocation categories, excluding funds of funds) from Morningstar.

The models are rigorously researched, analyzed and monitored by a team of investment professionals with decades of experience in equity, fixed income and multi-asset funds and solutions through varying market cycles.

That's why **80%** of the active American Funds Model Portfolios at Morgan Stanley received a gold Morningstar Medalist Rating.*

Analyst-Driven(%): 100%
Data Coverage(%): 100%

Source: Capital Group, based on Morningstar data.

*Refer to pages 12 through 14 for each model's Morningstar Medalist Rating™, Analyst-Driven and Data Coverage percentages. The Morningstar Medalist Ratings are as of 1/15/25 for the retirement income models, 7/19/24 for the tax-aware model and 8/13/24 for the growth and growth and income models. Capital Group did not compensate Morningstar for the ratings and comments contained in this material. However, the firm has paid Morningstar a licensing fee to access and publish its ratings data. The payment of this subscription fee does not give rise to a material conflict with Morningstar.

Data Coverage

The Data Coverage % data point is a summary metric describing the level of data completeness used to generate the overall rating. If the pillar is assigned directly or indirectly by analysts, the pillar has complete data availability, as no model was used to estimate the pillar score. If the pillar is assigned directly by algorithm, Morningstar counts the number of data points feeding both the positive and negative models and counts whether the vehicle has strategy-specific data available. A simple percentage is calculated per pillar. Each pillar-completeness metric is scaled by the weights listed in the section "Derive the Rating." For example, consider an active fund where all three pillar ratings are indirectly assigned by an analyst. In that scenario, the Data Coverage % data point would be 100%. However, if the analyst coverage changed and the People Pillar was no longer indirectly assigned by an analyst, then the People Pillar would be assigned directly by an algorithm. Across both the Positive and Negative People models, the algorithm uses 28 data points. Suppose the fund has all the input data for those data points except for the Manager Excess Return – 5-Year data point, which appears in both the Positive and Negative models. Under that scenario, Morningstar would have coverage of 26 out of 28 required People Pillar data points, or 92.9%. Since the People Pillar is a 45% weight for active funds, that would mean the overall data coverage would be 96.9% (45% for the Process Pillar plus 10% for the Parent Pillar plus 41.9% for the People Pillar).

Analyst-Driven

The Analyst-Driven % data point displays the weighted percentage of a vehicle's pillar ratings assigned directly or indirectly by analysts. For example, if the People and Parent ratings are assigned directly or indirectly by analysts but the Process rating is assigned algorithmically, the Analyst-Driven % for an actively managed vehicle would disclose that 55% of the pillar weight was assigned by analysts and the Analyst-Driven % for a passively managed vehicle would disclose that 20% of the pillar weight was assigned by analysts.

The Morningstar Medalist Rating is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please go to global.morningstar.com/managerdisclosures/. The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate. Capital Group did not compensate Morningstar for the ratings and comments contained in this material. However, the firm has paid Morningstar a licensing fee to access and publish its ratings data. The payment of this subscription fee does not give rise to a material conflict with Morningstar.

Portfolios with the right ingredients ...

A track record of superior returns

Most American Funds equity-focused funds have delivered superior lifetime results.

Figures shown are past results for Class F-2 shares and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com.

Average annual lifetime returns

American Funds equity-focused funds vs. relevant benchmark indexes

As of December 31, 2024

Source: Capital Group, based on Morningstar data. Returns are average annual total returns for benchmark indexes and average annual returns for funds at net asset value from fund inception through 12/31/24. Refer to page 16 for index comparisons. Funds shown may not currently be in each model. The market indexes are unmanaged, and their results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes. Investors cannot invest directly in an index.

*Source: Morningstar, "The Thrilling 30" by Russel Kinnel, August 20, 2024. Morningstar's screening took into consideration expense ratios, manager ownership, returns over manager's tenure, and Morningstar Risk, Analyst and Parent ratings. The universe was limited to share classes accessible to individual investors with a minimum investment no greater than \$50,000 and did not include funds of funds. Class A shares were evaluated for American Funds. Models herein use share class F-2. Not all 'Thrilling' funds are in every model. Visit morningstar.com for more details.

†Effective June 1, 2025, EuroPacific Growth Fund® is now EUPAC Fund.

... can help support your goals

Some of our Core and Core-Plus bond funds have offered better diversification amid equity volatility

While excess return is an important derivative of successful ingredients, it's not the only one. For fixed income funds, the ability to offer diversification during equity downturns can be critical to the success of any portfolio.

Figures shown are past results as of March 31, 2025, and are not predictive of results in future periods. Returns for mutual funds are based on Class F-2 shares. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com.

Higher returns with similar correlation to equities compared with Core¹

Five-year correlation and return

BFA and SBF have offered better returns in equity corrections than credit-focused bond funds²

Average cumulative excess return

¹Sources: Capital Group, Morningstar, as of 3/31/25. Return measure is average annual return. Correlation shown to the S&P 500 Index. Morningstar category: Intermediate Core Bond.

²Sources: Capital Group, Morningstar. As of 3/31/25. Averages for The Bond Fund of America were calculated by using the cumulative returns of funds versus Morningstar categories shown during the nine equity market correction periods since 2010. Averages for American Funds Strategic Bond Fund include five periods after its March 2016 inception. Corrections are based on price declines of 10% or more (without dividends reinvested) in the S&P 500 Index with at least 75% recovery. The cumulative returns are based on total returns. Ranges of returns for the equity corrections measured: The Bond Fund of America: -14.07% to 3.41%; American Funds Strategic Bond Fund: -14.46% to 3.04%; Morningstar US Fund Intermediate Core-Plus Bond: -14.73% to 2.25%; Morningstar US Fund Multisector Bond: -14.08% to -0.75%; S&P 500 Index: -33.79% to -9.94%. There have been periods when the funds have lagged the categories and the index, such as in rising equity markets.

Consistency and quality are vital ...

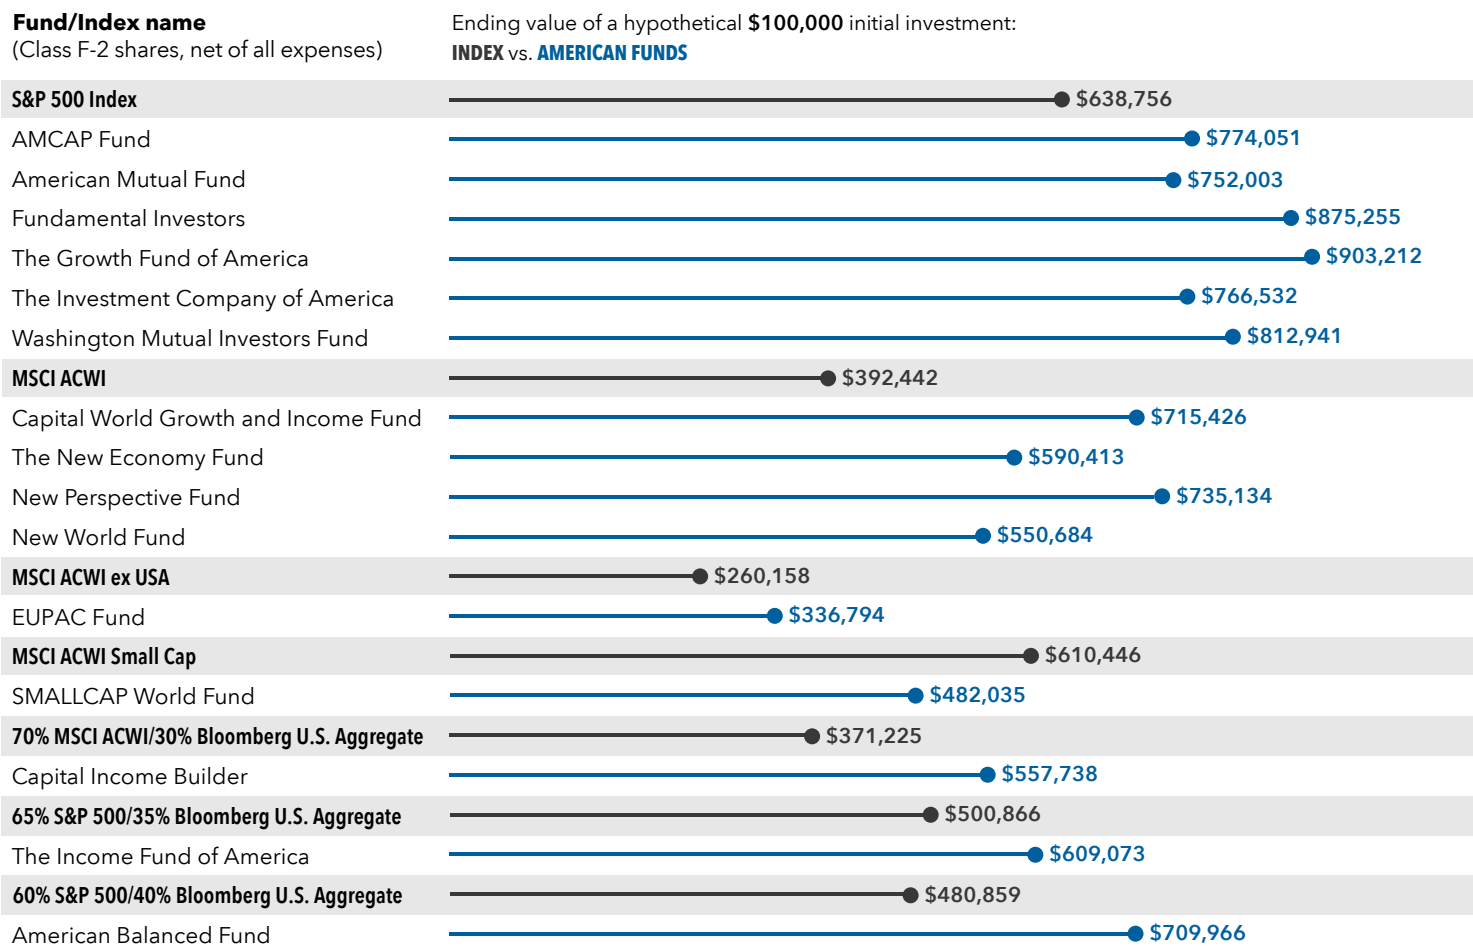

Equity-focused American Funds have generated wealth in accumulation ...

The illustrations below show how these equity-focused American Funds fared in the 21st century, as well as how investing during volatile periods could have delivered better results for investors.

EXHIBIT DETAILS

Growth of \$100,000 initial investment made on December 31, 1999 through December 31, 2024.

American Funds produced greater wealth on average: **\$169,693** over indexes.

Based on Class F-2 shares as of 12/31/24. Includes all equity-focused American Funds available for investment on 12/31/99, none of which have since been liquidated or merged. Refer to page 16 for the funds' rolling returns and success rates for this period.

Returns shown for indexes include reinvested dividends. The indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. There have been periods when the funds have lagged the index.

Past results are not predictive of results in future periods.

10 | Objective-based portfolios that pursue a variety of goals

... when selecting a portfolio's underlying ingredients

... and have maintained or even grown wealth in distribution.

EXHIBIT DETAILS

Growth of \$500,000 initial investment made on December 31, 1999 through December 31, 2024.

On average, American Funds ended the period having preserved more wealth: **\$820,711** greater than indexes.

\$729,185: Total amount withdrawn during the period. Monthly withdrawals totaled \$20,000 the first year (4% of the initial investment) and increased by 3% each year thereafter.

Expense ratio for the model is the weighted average of the underlying mutual funds' gross expense ratios as of their most recent prospectuses. Underlying mutual funds are based on Class F-2. Expense ratios do not reflect any advisory fee charged by model providers.

*Percent of initial investment. In some cases, all or a portion of any distribution from the model may include the investor's original investment. Payments consisting of return of capital will result in a decrease in an investor's fund share balance. Higher rates of withdrawal and withdrawals during declining markets may result in a more rapid decrease in an investor's fund share balance. Persistent returns of capital could ultimately result in a zero account balance. Withdrawal rate ranges are suggestions only and may change over time. Investors should work with a financial professional to determine the rate appropriate to their situation. Suggested withdrawal rates are developed using two types of analysis: forward-looking simulations as well as current and historical yields. Forward-looking simulations are developed from Capital Group's capital market assumptions and consider the yield and capital appreciation components of total return. These analyses help develop probabilities that the portfolios can sustain various withdrawal rates while preserving as much of an investor's initial principal as possible.

Investment results

Figures shown are past results for Class F-2 shares and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Please refer to capitalgroup.com for more information. Class F-2 shares were first offered on 8/1/08. Class F-2 share results prior to the date of first sale are hypothetical based on the results of the original share class of the fund without a sales charge, adjusted for typical estimated expenses. Results for certain funds with an inception date after 8/1/08, also include hypothetical returns because those funds' Class F-2 shares sold after the funds' date of first offering. Please refer to capitalgroup.com for more information on specific expense adjustments and the actual dates of first sale.

The expense ratios are as of each fund's prospectus available at the time of publication.

If used after 6/30/25, this material must be accompanied by the most recent American Funds quarterly statistical update.

How to find
these strategies
on WealthDesk

1. Go to 3D
2. Select "WealthDesk" tab at the top
3. Navigate to "Advise" at the top of the page, choose "Investment Screener"
4. At the top of the page, filter by product type, select "UMA"
5. Type "AFV-" in the search

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

If they are not, please request them from your Morgan Stanley Smith Barney LLC Financial Advisor.

Index comparisons (page 8): The 17 American Funds equity-focused funds used in our analysis (and the relevant indexes/index blends with which they were compared) are as follows: American Funds Global Balanced Fund (60%/40% MSCI All Country World Index/Bloomberg Global Aggregate Index); American Balanced Fund (60%/40% S&P 500 Index/Bloomberg U.S. Aggregate Index); The Income Fund of America (65%/35% S&P 500 Index/Bloomberg U.S. Aggregate Index); Capital Income Builder (70%/30% MSCI All Country World Index/Bloomberg U.S. Aggregate Index); New Perspective Fund (from 03/13/1973 through 09/30/2011, the MSCI World Index was used and the MSCI All Country World (ACWI) Index thereafter); Capital World Growth and Income Fund (through 11/30/2011, the MSCI World Index was used and the MSCI All Country World Index (ACWI) thereafter); New Perspective Fund, New World Fund, The New Economy Fund (MSCI All Country World Index (ACWI)); EUPAC Fund (through 03/31/2007, the MSCI EAFE® Index was used and the MSCI All Country World (ACWI) ex USA Index thereafter); SMALLCAP World Fund (through 09/30/2009, the S&P Global <\$3 Billion Index was used and the MSCI All Country World Small Cap Index thereafter); American Funds Global Insight Fund (MSCI World Index); AMCAP Fund, American Mutual Fund, Fundamental Investors, The Growth Fund of America, The Investment Company of America, Washington Mutual Investors Fund (S&P 500 Index). All relevant indexes listed are the funds' primary benchmarks. Index blends are rebalanced monthly.

Model portfolios are provided to financial intermediaries who may or may not recommend them to clients. The portfolios consist of an allocation of funds for investors to consider and are not intended to be investment recommendations. The portfolios are asset allocations designed for individuals with different time horizons, investment objectives and risk profiles. Allocations may change and may not achieve investment objectives. If a cash allocation is not reflected in a model, the intermediary may choose to add one. Capital Group does not have investment discretion or authority over investment allocations in client accounts. Rebalancing approaches may differ depending on where the account is held. Investors should talk to their financial professional for information on other investment alternatives that may be available. In making investment decisions, investors should consider their other assets, income and investments.

Model portfolios are subject to the risks associated with the underlying funds in the model portfolio. Investors should carefully consider investment objectives, risks, fees and expenses of the funds in the model portfolio, which are contained in the fund prospectuses. Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries. Smaller company stocks entail additional risks, and they can fluctuate in price more than larger company stocks. The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds. Investments in mortgage-related securities involve additional risks, such as prepayment risk. The use of derivatives involves a variety of risks, which may be different from, or greater

than, the risks associated with investing in traditional securities, such as stocks and bonds. A nondiversified fund has the ability to invest a larger percentage of assets in the securities of a smaller number of issuers than a diversified fund. As a result, poor results by a single issuer could adversely affect fund results more than if the fund were invested in a larger number of issuers. See the applicable prospectus for details.

For American Funds Strategic Bond Fund, frequent and active trading of portfolio securities may occur, which may involve correspondingly greater transaction costs, adversely affecting the results.

Capital Group manages equity assets through three investment groups. These groups make investment and proxy voting decisions independently. Fixed income investment professionals provide fixed income research and investment management across the Capital organization; however, for securities with equity characteristics, they act solely on behalf of one of the three equity investment groups.

60%/40% MSCI All Country World Index/Bloomberg Global Aggregate Index blends the MSCI All Country World Index with the Bloomberg Global Aggregate Index by weighting their cumulative total returns at 60% and 40%, respectively. The blend is rebalanced monthly.

60%/40% S&P 500 Index/Bloomberg U.S. Aggregate Index blends the S&P 500 with the Bloomberg U.S. Aggregate Index by weighting their cumulative total returns at 60% and 40%, respectively. The blend is rebalanced monthly. **65%/35% S&P 500 Index/Bloomberg U.S. Aggregate Index** blends the S&P 500 with the Bloomberg U.S. Aggregate Index by weighting their cumulative total returns at 65% and 35%, respectively. The blend is rebalanced monthly.

70%/30% MSCI All Country World Index/Bloomberg U.S. Aggregate Index blends the MSCI All Country World Index with the Bloomberg U.S. Aggregate Index by weighting their total returns at 70% and 30%, respectively. The blend is rebalanced monthly. **Bloomberg Global**

Aggregate Index represents the global investment-grade fixed income markets. **Bloomberg U.S. Aggregate Index** represents the U.S. investment-grade fixed-rate bond market. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes. **MSCI All Country World Index** is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. **MSCI All Country World ex USA Index** is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, excluding the United States. The index consists of more than 40 developed and emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. **MSCI All Country World Small Cap Index** is a free float-adjusted market capitalization-weighted index that is designed to measure equity market results of smaller capitalization companies in both developed and emerging markets. Results reflect dividends net of withholding taxes. **MSCI World Index** is a free float-adjusted market capitalization weighted index that is designed to measure equity market results of developed markets. The index consists of more than 20 developed market country indexes, including the United States. Results reflect dividends net of withholding taxes. **S&P 500 Index** is a market capitalization-weighted index based on the results of approximately 500 widely held common stocks.
