## Futures contracts

Contracts	Type	Number of contracts	Expiration date	Notional amount (000)	Value and unrealized appreciation (depreciation) at 10/31/2025 (000)
2 Year U.S. Treasury Note Futures	Long	1,343	1/6/2026	USD279,669	\$(422)
10 Year Ultra U.S. Treasury Note Futures	Short	733	12/31/2025	(84,650)	(488)
					<u><u>\$(910)</u></u>

<sup>(a)</sup> Step bond; coupon rate may change at a later date.

<sup>(b)</sup> Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$267,258,000, which represented 7.98% of the net assets of the fund.

<sup>(c)</sup> Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

<sup>(d)</sup> Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available. For short-term securities, the date of the next scheduled coupon rate change is considered to be the maturity date.

<sup>(e)</sup> Scheduled interest and/or principal payment was not received.

<sup>(f)</sup> For short-term securities, the mandatory put date is considered to be the maturity date.

## Valuation disclosures

---

Capital Research and Management Company ("CRMC"), the fund's investment adviser, values the fund's investments at fair value as defined by accounting principles generally accepted in the United States of America. The net asset value per share is calculated once daily as of the close of regular trading on the New York Stock Exchange, normally 4 p.m. New York time, each day the New York Stock Exchange is open. Security transactions are recorded by the fund as of the date the trades are executed with brokers.

**Methods and inputs** – The fund's investment adviser uses the following methods and inputs to establish the fair value of the fund's assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

Fixed-income securities, including short-term securities, are generally valued at evaluated prices obtained from third-party pricing vendors. Vendors value such securities based on one or more of the following inputs: benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads, interest rate volatilities, and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and other reference data. For certain distressed securities, valuation may include cash flows or liquidation values using a net present value calculation based on inputs that include, but are not limited to, financial statements and debt contracts.

Exchange-traded futures are generally valued at the official settlement price on the exchange or market on which such instruments are traded, as of the close of business on the day the futures are being valued. The average month-end notional amount of futures contracts while held was \$184,687,000.

Securities and other assets for which representative market quotations are not readily available or are considered unreliable by the fund's investment adviser are fair valued as determined in good faith under fair valuation guidelines adopted by the fund's investment adviser and approved by the board of trustees as further described. The investment adviser follows fair valuation guidelines, consistent with U.S. Securities and Exchange Commission rules and guidance, to consider relevant principles and factors when making fair value determinations. The investment adviser considers relevant indications of value that are reasonably and timely available to it in determining the fair value to be assigned to a particular security, such as the type and cost of the security, restrictions on resale of the security, relevant financial or business developments of the issuer, actively traded similar or related securities, dealer or broker quotes, conversion or exchange rights on the security, related corporate actions, significant events occurring after the close of trading in the security, and changes in overall market conditions. In addition, the closing prices of equity securities that trade in markets outside U.S. time zones may be adjusted to reflect significant events that occur after the close of local trading but before the net asset value of each share class of the fund is determined. Fair valuations of investments that are not actively trading involve judgment and may differ materially from valuations that would have been used had greater market activity occurred.

**Processes and structure** – The fund's board of trustees has designated the fund's investment adviser to make fair value determinations, subject to board oversight. The investment adviser has established a Joint Fair Valuation Committee (the "Committee") to administer, implement and oversee the fair valuation process and to make fair value decisions. The Committee regularly reviews its own fair value decisions, as well as decisions made under its standing instructions to the investment adviser's valuation team. The Committee reviews changes in fair value measurements from period to period, pricing vendor information and market data, and may, as deemed appropriate, update the fair valuation guidelines to better reflect the results of back testing and address new or evolving issues. Pricing decisions, processes and controls over security valuation are also subject to additional internal reviews facilitated by the investment adviser's global risk management group. The Committee reports changes to the fair valuation guidelines to the board of trustees. The fund's board and audit committee also regularly review reports that describe fair value determinations and methods.

**Classifications** – The fund’s investment adviser classifies the fund’s assets and liabilities into three levels based on the inputs used to value the assets or liabilities. Level 1 values are based on quoted prices in active markets for identical securities. Level 2 values are based on significant observable market inputs, such as quoted prices for similar securities and quoted prices in inactive markets. Certain securities trading outside the U.S. may transfer between Level 1 and Level 2 due to valuation adjustments resulting from significant market movements following the close of local trading. Level 3 values are based on significant unobservable inputs that reflect the investment adviser’s determination of assumptions that market participants might reasonably use in valuing the securities. The valuation levels are not necessarily an indication of the risk or liquidity associated with the underlying investment. For example, U.S. government securities are reflected as Level 2 because the inputs used to determine fair value may not always be quoted prices in an active market. The fund’s valuation levels as of October 31, 2025, were as follows (dollars in thousands):

		Investment securities			
		Level 1	Level 2	Level 3	Total
<b>Assets:</b>					
Bonds, notes & other debt instruments:					
	Municipals	\$—	\$3,159,862	\$—	\$3,159,862
