# ... and strong active management

## A distinctive investment approach

The Capital System™ powers our pursuit of superior long-term investment results across asset classes. Each portfolio is divided among multiple investment professionals. We believe having multiple managers in a portfolio better positions us to deliver the strong results investors seek.

### The Capital System

### The benefits of our approach

- ✓ **Deeper insights:** Investment professionals develop their views leveraging research from multiple angles.
- ✓ **Broader diversification:** Portfolios reflect diverse perspectives, which can lead to more consistent results over multiple cycles.
- ✓ **High-conviction portfolios:** Portfolios reflect the highest individual convictions of multiple investment professionals.
- ✓ **No "key person" risk:** Our results don't rely on one manager always being right, and succession planning is embedded in the process.

### Stewardship matters

We received a "High" Parent rating by Morningstar, reflecting an investment culture marked by lengthy tenures, strong manager fund ownership and competitive long-term results.<sup>1</sup>

### Investing with you matters

# 94%

of American Funds assets are invested in mutual funds in which at least one manager has invested more than \$1 million.<sup>2</sup>

### Low cost matters

About half of our fund management fees rank in the lowest quintile compared with peers.<sup>3</sup>

Source: Capital Group, based on Morningstar data.

Footnotes/Important information:

<sup>1</sup>Morningstar examined companies' cultures and ethical track records, along with the factors considered in its Morningstar Medalist Rating™ to determine rating for a fund company in one of five buckets: Low, Below Average, Average, Above Average, and High, with High being the best. Capital Group received a Parent rating of High as of January 5, 2026. 19% of 194 firms analyzed also received the same rating as of that date. The parent pillar rating is a current view and is reflective of a firm's history, both recent and long-term. Capital Group did not compensate Morningstar for the ratings and comments contained in this material. However, the firm has paid Morningstar a licensing fee to access and publish its ratings data.

<sup>2</sup>Source: Morningstar. As of 2/18/26.

<sup>3</sup>On average, our mutual fund management fees were in the lowest quintile 57% of the time, based on the 20-year period ended December 31, 2025, versus comparable Lipper categories, excluding funds of funds.

## Our team at work for you

**Ongoing thematic research**  
Informs the PSC's decision making.

Our analysts conduct in-depth research and continually assess the market environment to identify opportunities to enhance the portfolio.

Our approach is anchored in investors' goals. Using qualitative and quantitative analysis, we develop various investor personas to identify needs and create portfolios tailored to investor goals.

The PSC and research analysts work closely to ensure portfolios can be rebalanced when necessary and remain aligned with investor goals, especially when markets fluctuate.

Footnote/Important information:

\*As of 12/31/25. Largest multi-asset manager calculated by Capital Group is based on data (total net assets of U.S. open-end mutual funds in all U.S. Fund Allocation categories, excluding funds of funds) from Morningstar.

The models are rigorously researched, analyzed and monitored by a team of investment professionals with decades of experience in equity, fixed income and multi-asset funds and solutions through varying market cycles.

That's why **64%** of the active American Funds Model Portfolios at UBS received a gold Morningstar Medalist Rating.\*

Analyst-Driven (%): 100  
Data coverage (%): 100

Source: Capital Group, based on Morningstar data.

\*Refer to pages 12 and 13 for each model's Morningstar Medalist Rating™, Analyst-Driven and Data Coverage percentages. The Morningstar Medalist Rating is a forward-looking assessment assigned by Morningstar's research analysts. It reflects their qualitative evaluation of an investment strategy's potential to outpace its category benchmark over a full market cycle on a risk-adjusted basis and net of fees. Morningstar bases its ratings on three key pillars – People, Parent and Process – alongside a fee assessment. The Medalist Rating does not reference a specific time period but is based on qualitative and select quantitative data as of 8/12/25, respectively. Capital Group has paid Morningstar a licensing fee to access and publish its ratings data. Ratings provided as of the following dates: 8/11/25 for the American Funds Growth Model Portfolio, American Funds Moderate Growth Model Portfolio, and American Funds Moderate Growth and Income Model Portfolio; 8/12/25 American Funds Conservative Growth and Income Model Portfolio; 8/6/25 for American Funds Conservative Income Model Portfolio; and 7/16/25 for American Funds Tax-Aware Moderate Income Model Portfolio and American Funds Tax-Aware Conservative Income Model Portfolio. Capital Group did not compensate Morningstar for the ratings and comments contained in this material.

The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please visit Morningstar's website and refer to its compliance and disclosures. The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate. Capital Group did not compensate Morningstar for the ratings and comments contained in this material. However, the firm has paid Morningstar a licensing fee to access and publish its ratings data.

# Portfolios with the right ingredients ...

## A track record of superior returns

Most American Funds equity-focused funds have delivered superior lifetime results.

Figures shown are past results for Class F-2 shares and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit [capitalgroup.com](http://capitalgroup.com).

### Average annual lifetime returns

#### American Funds equity-focused funds vs. relevant benchmark indexes

As of December 31, 2025

Source: Capital Group, based on Morningstar data. Returns are average annual total returns for benchmark indexes and average annual returns for funds at net asset value from fund inception through 12/31/25. Refer to page 16 for index comparisons. Funds shown may not currently be in each model.

The market indexes are unmanaged, and their results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes. Investors cannot invest directly in an index.

Footnote/Important information:

\*Source: Morningstar, "The Thrilling 33" by Russel Kinnel, August 13, 2025. Morningstar's screening took into consideration expense ratios, manager ownership, returns over manager's tenure and Morningstar Risk, Medalist and Parent ratings. The universe was limited to share classes accessible to individual investors with a minimum investment no greater than \$50,000, did not include funds of funds and must be rated by Morningstar analysts. Class A shares were evaluated for American Funds. Not all models include funds that made the list or all six funds. Underlying funds may change over time. The Thrilling 33 list includes American Balanced Fund, American Mutual Fund, Capital Income Builder, The Income Fund of America, The New Economy Fund and New Perspective Fund. Visit Morningstar's website for more details.

# ... can help support your goals

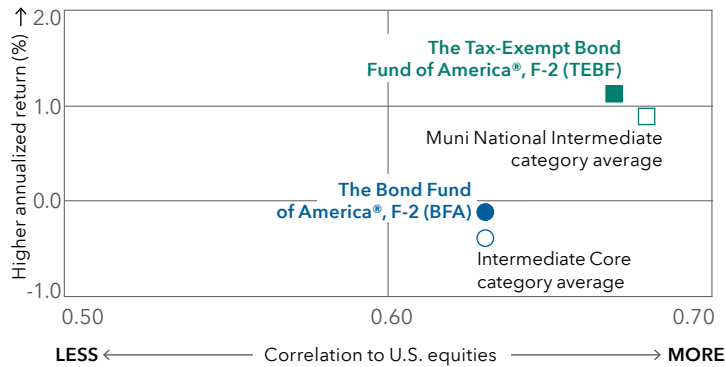

## Core spotlight: The Bond Fund of America and The Tax-Exempt Bond Fund of America

While excess return is an important derivative of successful ingredients, it's not the only one. For fixed income funds, the ability to offer diversification during equity downturns can be critical to the success of any portfolio.

Figures shown are past results for Class F-2 shares as of December 31, 2025, and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit [capitalgroup.com](https://capitalgroup.com).

### Better diversification amid equity volatility

Higher returns at similar or lower correlations than peers over a five-year period<sup>1</sup>

BFA and TEBF outpaced credit-driven categories in periods of equity correction, thereby providing better diversification<sup>2</sup>

Average cumulative excess return

Footnotes/Important information:

<sup>1</sup>Sources: Capital Group, Morningstar. Data as of 12/31/25. Return measure is average annual return. Morningstar categories are Intermediate Core Bond and Muni National Intermediate. Correlation shown to the S&P 500 Index.

<sup>2</sup>Sources: Capital Group, Morningstar. Data as of 12/31/25. Figures were calculated by using the average cumulative returns of funds versus the average cumulative returns of Morningstar categories shown during the 10 equity market correction periods since 2010. Corrections are based on price declines of 10% or more (without dividends reinvested) in the S&P 500 Index with at least 75% recovery. The cumulative returns are based on total returns. Ranges of returns for the equity corrections measured: The Bond Fund of America: -14.07% to 3.41%; The Tax-Exempt Bond Fund of America: -11.36% to 6.14%; Morningstar Intermediate Core-Plus Bond category: -14.73% to 2.25%; Morningstar Multisector Bond category: -14.08% to -0.75%; S&P 500 Index: -33.79% to -9.94%. There have been periods when the funds have lagged the categories and the index, such as in rising equity markets.

# Consistency and quality are vital ...

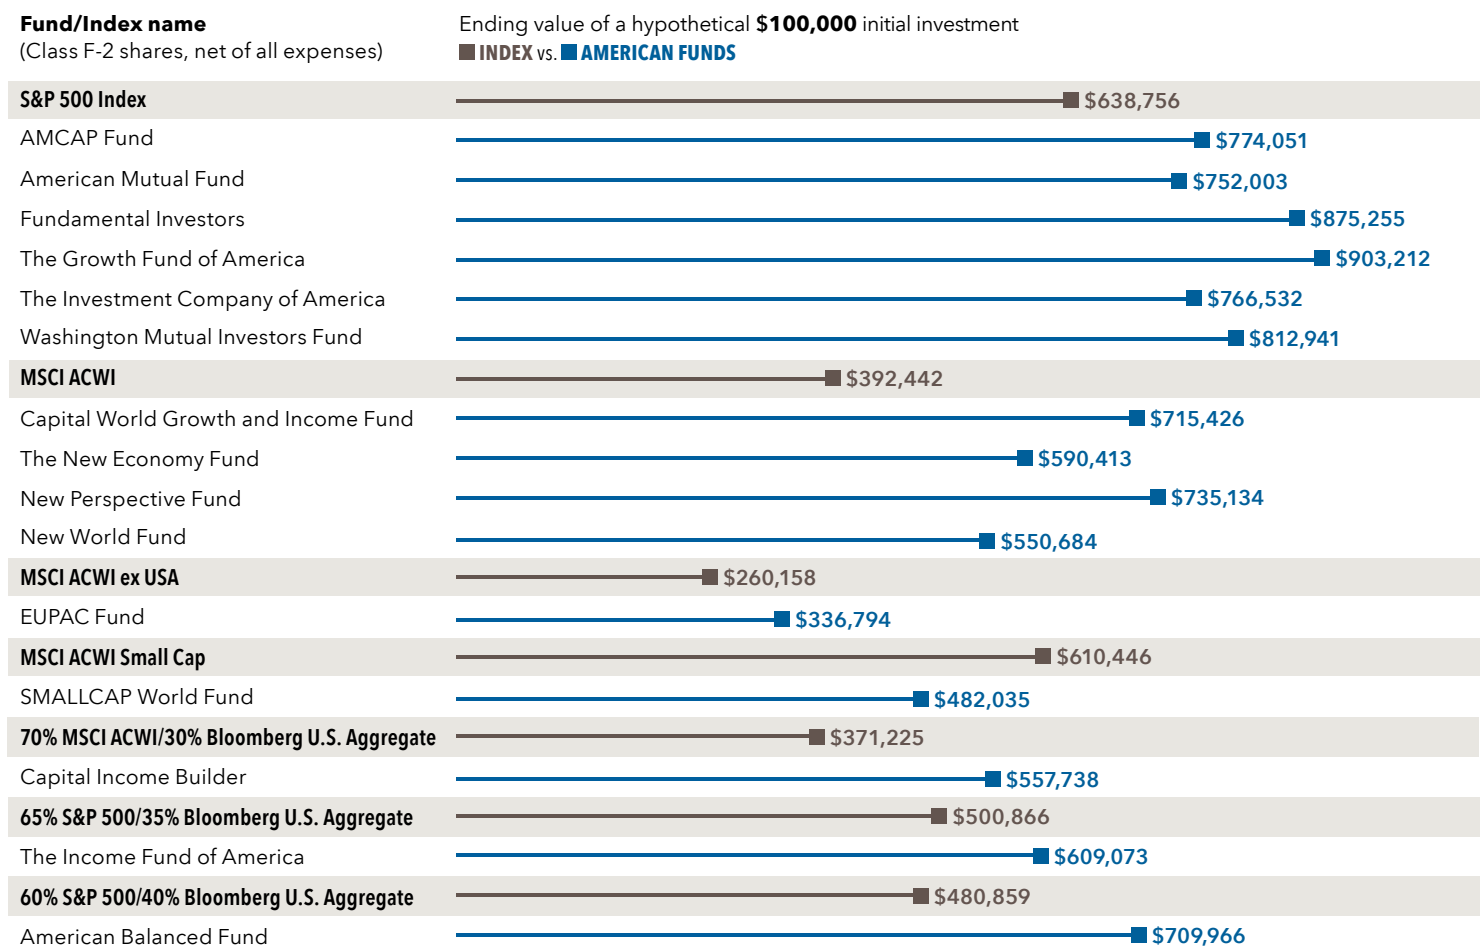

## Equity-focused American Funds have generated wealth in accumulation ...

The illustrations below show how these equity-focused American Funds fared in the 21st century, as well as how investing during volatile periods could have delivered better results for investors.

### EXHIBIT DETAILS

Growth of \$100,000 initial investment made on December 31, 1999 through December 31, 2024.

American Funds produced greater wealth on average: **\$169,693** over indexes.

Based on Class F-2 shares as of 12/31/24. Includes all equity-focused American Funds available for investment on 12/31/99, none of which have since been liquidated or merged. Refer to page 16 for the funds' rolling returns and success rates for this period.

Returns shown for indexes include reinvested dividends. The market indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. There have been periods when the funds have lagged the index.

Past results are not predictive of results in future periods.

# ... when selecting a portfolio's underlying ingredients

... and have maintained or even grown wealth in distribution.

## EXHIBIT DETAILS

Growth of \$500,000 initial investment made on December 31, 1999 through December 31, 2024.

On average, American Funds ended the period having preserved more wealth: **\$820,711** greater than indexes.

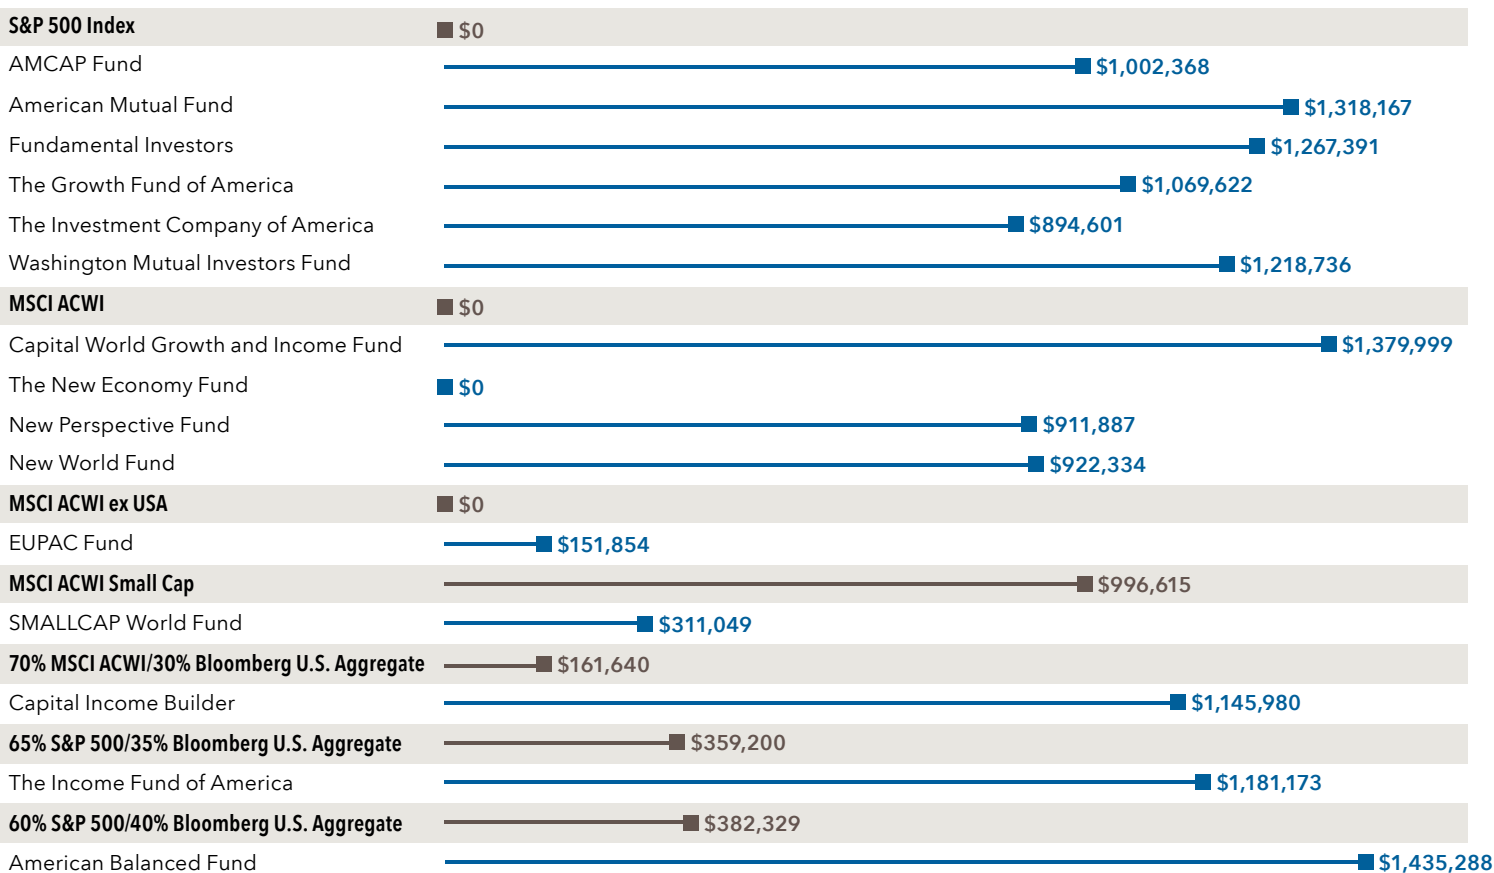

\$729,185: Total amount withdrawn during the period. Monthly withdrawals totaled \$20,000 the first year (4% of the initial investment) and increased by 3% each year thereafter.

### Fund/Index name

(Class F-2 shares, net of all expenses)

Ending value of a hypothetical **\$500,000** initial investment

■ INDEX vs. ■ AMERICAN FUNDS

Based on Class F-2 shares as of 12/31/24. Includes all equity-focused American Funds available for investment on 12/31/99, none of which have since been liquidated or merged. Refer to page 16 for the funds' rolling returns and success rates for this period.

Capital Group calculations based on Capital Group and Morningstar data, 12/31/99 to 12/31/24. All comparisons are to each fund's primary or secondary benchmarks as of 12/31/24. Refer to individual fund detail pages at [capitalgroup.com](https://capitalgroup.com) for current information and any applicable benchmark index changes.

Past results are not predictive of results in future periods.

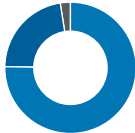

# American Funds core model portfolios

## Diversified models that offer a balanced menu for every investor

A balanced selection of assets can help investors as they consider risk and return. Holding a broad range of investments can help lessen the impact that any one economic or market event might have on their portfolio.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Please refer to [capitalgroup.com](http://capitalgroup.com) for more information. Class F-2 shares were first offered on 8/1/08. Class F-2 share results prior to the date of first sale are hypothetical based on Class A share results without a sales charge, adjusted for typical estimated expenses. Results for certain funds with an inception date after 8/1/08, also include hypothetical returns because those funds' Class F-2 shares sold after the funds' date of first offering. Please refer to [capitalgroup.com](http://capitalgroup.com) for more information on specific expense adjustments and the actual dates of first sale.

The expense ratios are as of each fund's prospectus available at the time of publication.

If used after 3/31/26, this material must be accompanied by the most recent American Funds quarterly statistical update.

All relevant indexes listed are the funds' primary benchmarks. Index blends are rebalanced monthly.

Model portfolios are subject to the risks associated with the underlying funds in the model portfolio. Investors should carefully consider investment objectives, risks, fees and expenses of the funds in the model portfolio, which are contained in the fund prospectuses. Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries. Smaller company stocks entail additional risks, and they can fluctuate in price more than larger company stocks. The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds. Investments in mortgage-related securities involve additional risks, such as prepayment risk. The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds. A nondiversified fund has the ability to invest a larger percentage of assets in the securities of a smaller number of issuers than a diversified fund. As a result, poor results by a single issuer could adversely affect fund results more than if the fund were invested in a larger number of issuers. See the applicable prospectus for details.

Capital Group manages equity assets through three investment groups. These groups make investment and proxy voting decisions independently. Fixed income investment professionals provide fixed income research and investment management across the Capital organization; however, for securities with equity characteristics, they act solely on behalf of one of the three equity investment groups.

60%/40% MSCI All Country World Index/Bloomberg Global Aggregate Index blends the MSCI All Country World Index with the Bloomberg Global Aggregate Index by weighting their cumulative total returns at 60% and 40%, respectively. The blend is rebalanced monthly.
