The 60%/40% S&P 500/Bloomberg U.S. Aggregate Index blends (for the period July 31, 1975 to December 31, 1975, Bloomberg Government/Credit Bond Index was used) the S&P 500 with the Bloomberg U.S. Aggregate by weighting their total returns at 60% and 40%, respectively. The index blend is rebalanced monthly. Volatility is calculated using annualized standard deviation (based on monthly returns), a measure of how returns over time have varied from the mean; a lower number signifies lower volatility.
